WHO WE ARE

We specialize in food packaging and tableware, creating innovative solutions that balance functionality and sustainability. Our eco-conscious products serve sectors such as foodservice, HORECA, retail, and the travel market. We design recyclable, food-safe materials that meet the highest industry standards. As environmental responsibility grows more urgent, we lead the way toward a greener future. Our technology and design expertise enable us to create solutions that reduce environmental impact while maintaining quality and safety. Every product we produce meets the strictest food safety and legal standards for customer peace of mind. We offer versatile solutions for various markets, from restaurants to airlines. Together, we aim to create a cleaner, greener world—one package at a time.

SUSTAINABLE SOLUTIONS IN TABLEWARE AND FOOD PACKAGING

At deSter x nupik, we believe that sustainable packaging and tableware should be accessible to everyone, regardless of where they are or what type of cuisine they enjoy.

Our dedication to sustainability is reflected in our continuous pursuit of the best materials for our products. Every day, our team explores innovative materials and technologies to enhance the sustainability of our packaging and tableware. We understand that the right materials make all the difference in reducing environmental impact, and we are relentless in our efforts to find options that are both environmentally responsible and practical for everyday use.

Based in the vibrant city of Barcelona, we are inspired by its cosmopolitan spirit that embraces diverse cultures,

culinary traditions, and design trends.

Barcelona's geographical location also plays a significant role in our identity. It is a city that connects the south with the north, acting as a bridge not just within Spain but across Europe.

At deSte x nupik, we aspire to mirror this connection by creating products that bring people together, transcending borders and cultures. Our mission is to make sustainable packaging and tableware a universal choice, suitable for every culture, every type of cuisine, and every dining experience—whether it's dining in or taking food to go.

Our catalog is thoughtfully designed with our customers in mind. We aim to provide versatile, high-quality products that cater to a wide range of needs and preferences.

SINCE 2024

ABOUT deSter

deSter is a leading provider of innovative and sustainable food packaging and serveware concepts to the aviation, hospitality,

and food service industries. The environment is at the heart of everything deSter does and everything it produces. As a forward-

thinking designer and global manufacturer, deSter prioritizes environmental protection, social responsibility and economic

sustainability. A bespoke ESG framework defines focus topics, regular evaluations, and the sharing of the findings.

Through dedicated research and close collaboration with their customers, deSter is able to deliver functional & attractive products that not only deliver on today's

requirements but also anticipate the needs of tomorrow.

ECOVADIS PLATINUM

AWARD FOR SUSTAINABLE SOLUTIONS

EcoVadis stands as a leading global authority in evaluating Social and Environmental (ESG) performance, offering a comprehensive assessment and guidance on sustainability practices. Established with the vision of promoting sustainable business practices across the globe, EcoVadis has built a reputation for its impartiality, reliability, and robust evaluation methodology. It serves as a critical partner for businesses seeking to understand, improve, and communicate their sustainability performance.

With a vast network that encompasses over 100,000 rated companies across diverse sectors, EcoVadis provides organizations with a trusted platform to benchmark their sustainability practices against industry standards and global best practices. Its extensive reach includes companies of all sizes

and industries, ranging from small enterprises to multinational corporations. This broad spectrum not only highlights EcoVadis' credibility but also underscores its role in driving sustainability on a global scale.

At the core of EcoVadis' evaluation process lies a robust methodology grounded in internationally recognized sustainability benchmarks. These include the Global Reporting Initiative (GRI), the United Nations Global Compact, and ISO 26000, among others. By leveraging these authoritative frameworks, EcoVadis ensures that its assessments are comprehensive, objective, and aligned with global sustainability standards.

The evaluation process scrutinizes companies' initiatives and outcomes through a structured approach focusing on three

key pillars: Policies, Actions, and Results. This approach allows for a nuanced understanding of how sustainability commitments are translated into tangible outcomes.

The EcoVadis assessment framework spans four critical domains that encapsulate the broad spectrum of sustainability: Environment, Labor & Human Rights, Ethics, and Sustainable Procurement. Each domain is meticulously evaluated to provide a holistic view of a company's sustainability efforts.

Achieving an EcoVadis rating is a significant milestone for any organization, symbolizing its dedication to sustainable practices. Attaining the prestigious Platinum rating, for instance, is a testament to a company's exceptional performance in sustainability.

PEOPLEPLANETPRODUCT

SUSTAINABILITY IS AT THE HEART OF EVERYTHING WE DO

At deSter, sustainability is embedded in our core values, guiding every decision we make. We believe that environmental stewardship, social responsibility, and strong governance are essential for long-term success. Inspired by Robert Swan's words, we recognize that it is our duty to contribute actively to the planet's future.

Our ESG (Environmental, Social, and Governance) framework shapes how we define priorities, measure outcomes, and report progress. We focus on reducing our environmental impact through sustainable manufacturing practices. In 2023, we enhanced our ESG strategy with a double materiality assessment, aligning with the European Sustainability Reporting Standards (ESRS). This assessment helps us

understand both how we impact the environment and how environmental factors affect our business.

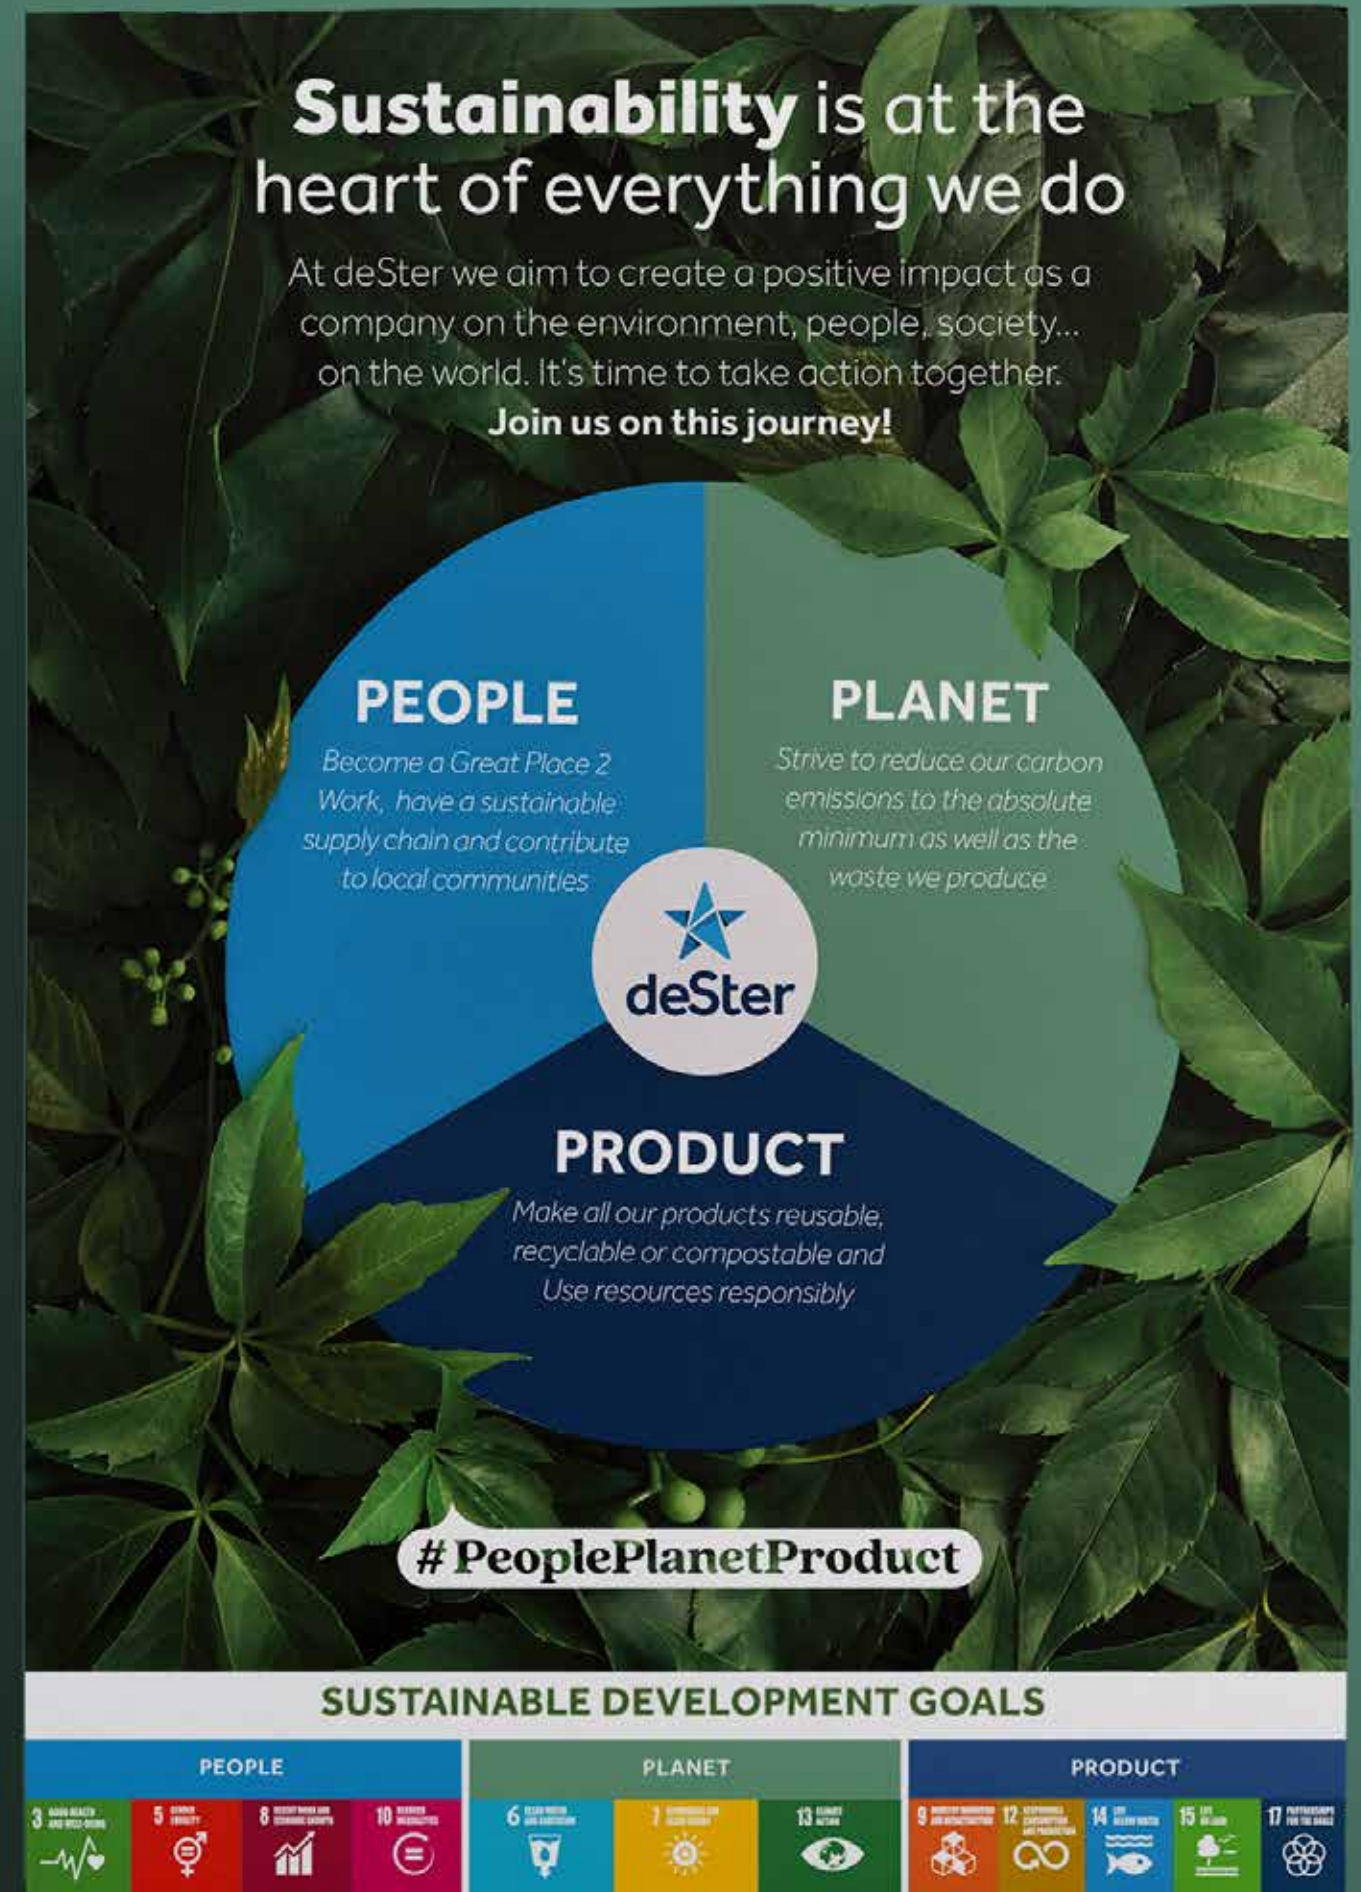

Our commitment to ESG is summarized in three key pillars: People, Planet, and Product. Under "People," we prioritize the well-being of our employees, customers, and the communities we serve. We foster an inclusive work environment, ensuring diversity, equity, and continuous development opportunities.

For "Planet," our goal is to achieve a net-zero carbon footprint and minimize operational waste. We actively engage in initiatives that protect biodiversity and promote resource conservation. Our "Product" pillar focuses on creating sustainable products that support a circular economy. We design and manufacture with responsible resource

usage, aiming for durability, recyclability, and minimal environmental impact.

Transparency is key to our ESG approach, as we regularly report our progress to stakeholders. We collaborate with supply chain partners to ensure ethical practices and sustainability throughout our operations. Continuous improvement drives our ESG efforts, encouraging innovation in sustainable design and processes.

Our ESG strategy is not just about compliance but creating real, positive change in the world. We engage with local communities to support social initiatives and environmental programs. At deSter, we are committed to leading by example, showing that business success and sustainability can go hand in hand.

PEOPLE

GOALS

Be a “Great place 2 work”

2025

Become a reliable employer that takes care of its employees

Establish a fully committed supply chain

2025

Only work with partners that are committed to high social and environmental goals

Actively contribute to communities

2025

Work with local communities to reduce plastic pollution worldwide via collaboration, volunteering, probono work and donations

ESRS S1 Own Workforce
ESRS S2 Workers in the value chain
G1 Business conduct
(see Governance section)

MAIN RESULTS

eNPS: 9,2 | Employee engagement
Goal 2025 = 30

79% | Participation rate global employee survey

9% | Voluntary leave turnover
vs 18% in 2022

49% WOMAN | 51% MAN

Well-being and training programs in place

Health & safety
0.15 | Global lost time injury rate
vs 0,46 industry standard*
(*Belgium)

SUSTAINABLE PROCREMENT

97% | Code of conduct signature
100% | of targeted suppliers audited on ESG
Corrective action plans in place

COMMUNITY OUTREACH

Plastic Cleanups, educational events, students involvement...
on avoiding plastic pollution + support of the River Cleanup

PLANET

GOALS

Reach net-zero carbon

2025

Achieve 25% carbon footprint reduction across our entire value chain, compared to 2019

2030

Reach net-zero carbon across our internal operations
Achieve 75% carbon footprint reduction across our entire value chain, compared to 2019

2050

Reach net-zero carbon across our entire value chain

Avoid waste, pollution, and protect biodiversity

2030

Achieve net-zero waste across our internal operations

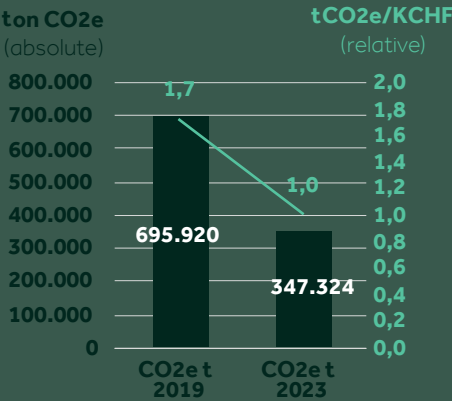

2030

Contribute to reach nature positive in 2030

ESRS E1 Climate Change
ESRS E2 Pollution
ESRS E3 Water and marine resources
ESRS E4 Biodiversity and Ecosystems

MAIN RESULTS

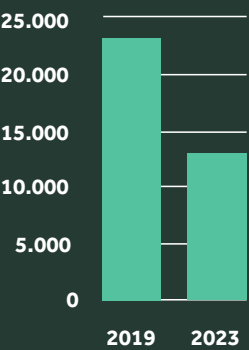

50% REDUCTION IN GHG EMISSIONS since 2019

Reduction mainly driven by Scope 3 actions:

- Use of renewable resources (fiber-based)
- Shift to reusable products
- Investments in local production

29% LESS OPERATIONAL WASTE since 2019 (Tons)
On track

BIODIVERSITY FOCUS AREAS

Integrated into Planet and Product

- Climate change (Reach net-zero carbon)
- Impact on ecosystems (Circular economy)
- Land use and land use change (Responsible resource use)

PRODUCT

GOALS

Champion circular economy

2020

Since 2020, we have only launched new products that are reusable, recyclable or compostable

2025

All products are either reusable, recyclable or compostable, with unnecessary single-use plastic phased out

2030

100% of our products create zero waste and we only sell products with guaranteed circularity

Responsible resources

2025

We work exclusively with responsible resources and sustainable materials

Remove PFA

2025

Remove all added fluorinated compounds from packaging materials beyond regulation requirements

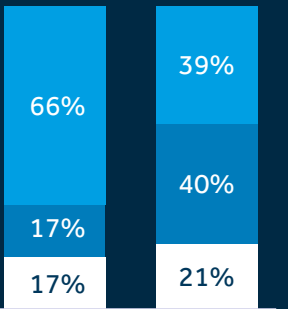

ESRS E5 Resource use and circular economy
ESRS S4 Consumer and end-Users

MAIN RESULTS

CIRCULAR ECONOMY

61% revenue sustainable packaging vs total packaging revenue
On track

INCREASE IN REUSABLE AND COMPOSTABLE PACKAGING

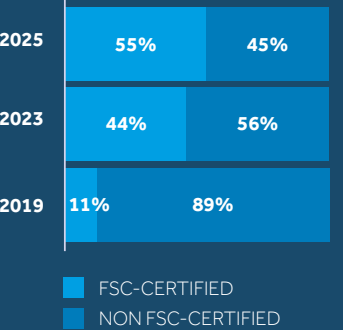

2019 2023
■ SINGLE USE PLASTICS
■ COMPOSTABLES
■ REUSABLES

52% reduction in single-use plastics weight sold since 2019

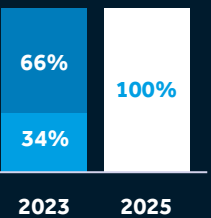

RESPONSIBLE RESOURCES

FSC-certified food contact products of virgin fiber

■ FSC-CERTIFIED
■ NON FSC-CERTIFIED

DESTUDIO

IN-HOUSE DESIGN AND PRODUCT DEVELOPMENT

deSter is proud to feature deStudio, our in-house team of award-winning designers, engineers, product developers, and materials experts.

This dynamic team plays a crucial role in shaping innovative solutions tailored to our clients' needs. Working closely with hospitality market experts, deStudio stays ahead of industry trends and insights. This collaboration ensures that every project is backed by cutting-edge knowledge.

At deStudio, we handle every stage of development completely in-house. From the initial idea and concept to technical design and final production, our team manages it all.

We specialize in creating tableware, equipment, and food packaging that reflect each client's unique

identity. Our approach is both creative and technical, balancing aesthetics with functionality. The synergy between design and engineering allows us to deliver exceptional products.

deStudio's expertise ensures that every detail aligns with our clients' vision. Our materials experts select sustainable, high-quality options to meet modern demands.

This commitment to innovation drives our success in the hospitality market. Whether reimagining tableware or developing eco-friendly packaging, we focus on excellence. Each project is a reflection of our passion for design and quality.

Our goal is to transform ideas into impactful, tangible products that stand out.

MATERIALS

Eco-friendly materials utilized in food packaging prioritize sustainability and environmental responsibility. These materials are carefully selected to minimize harm to the planet while still providing effective packaging solutions.

They are biodegradable, compostable, or recyclable, contributing to a reduction in waste and pollution. By embracing eco-friendly materials, food packaging strives to align with principles of a circular economy, where resources are used efficiently and waste is minimized.

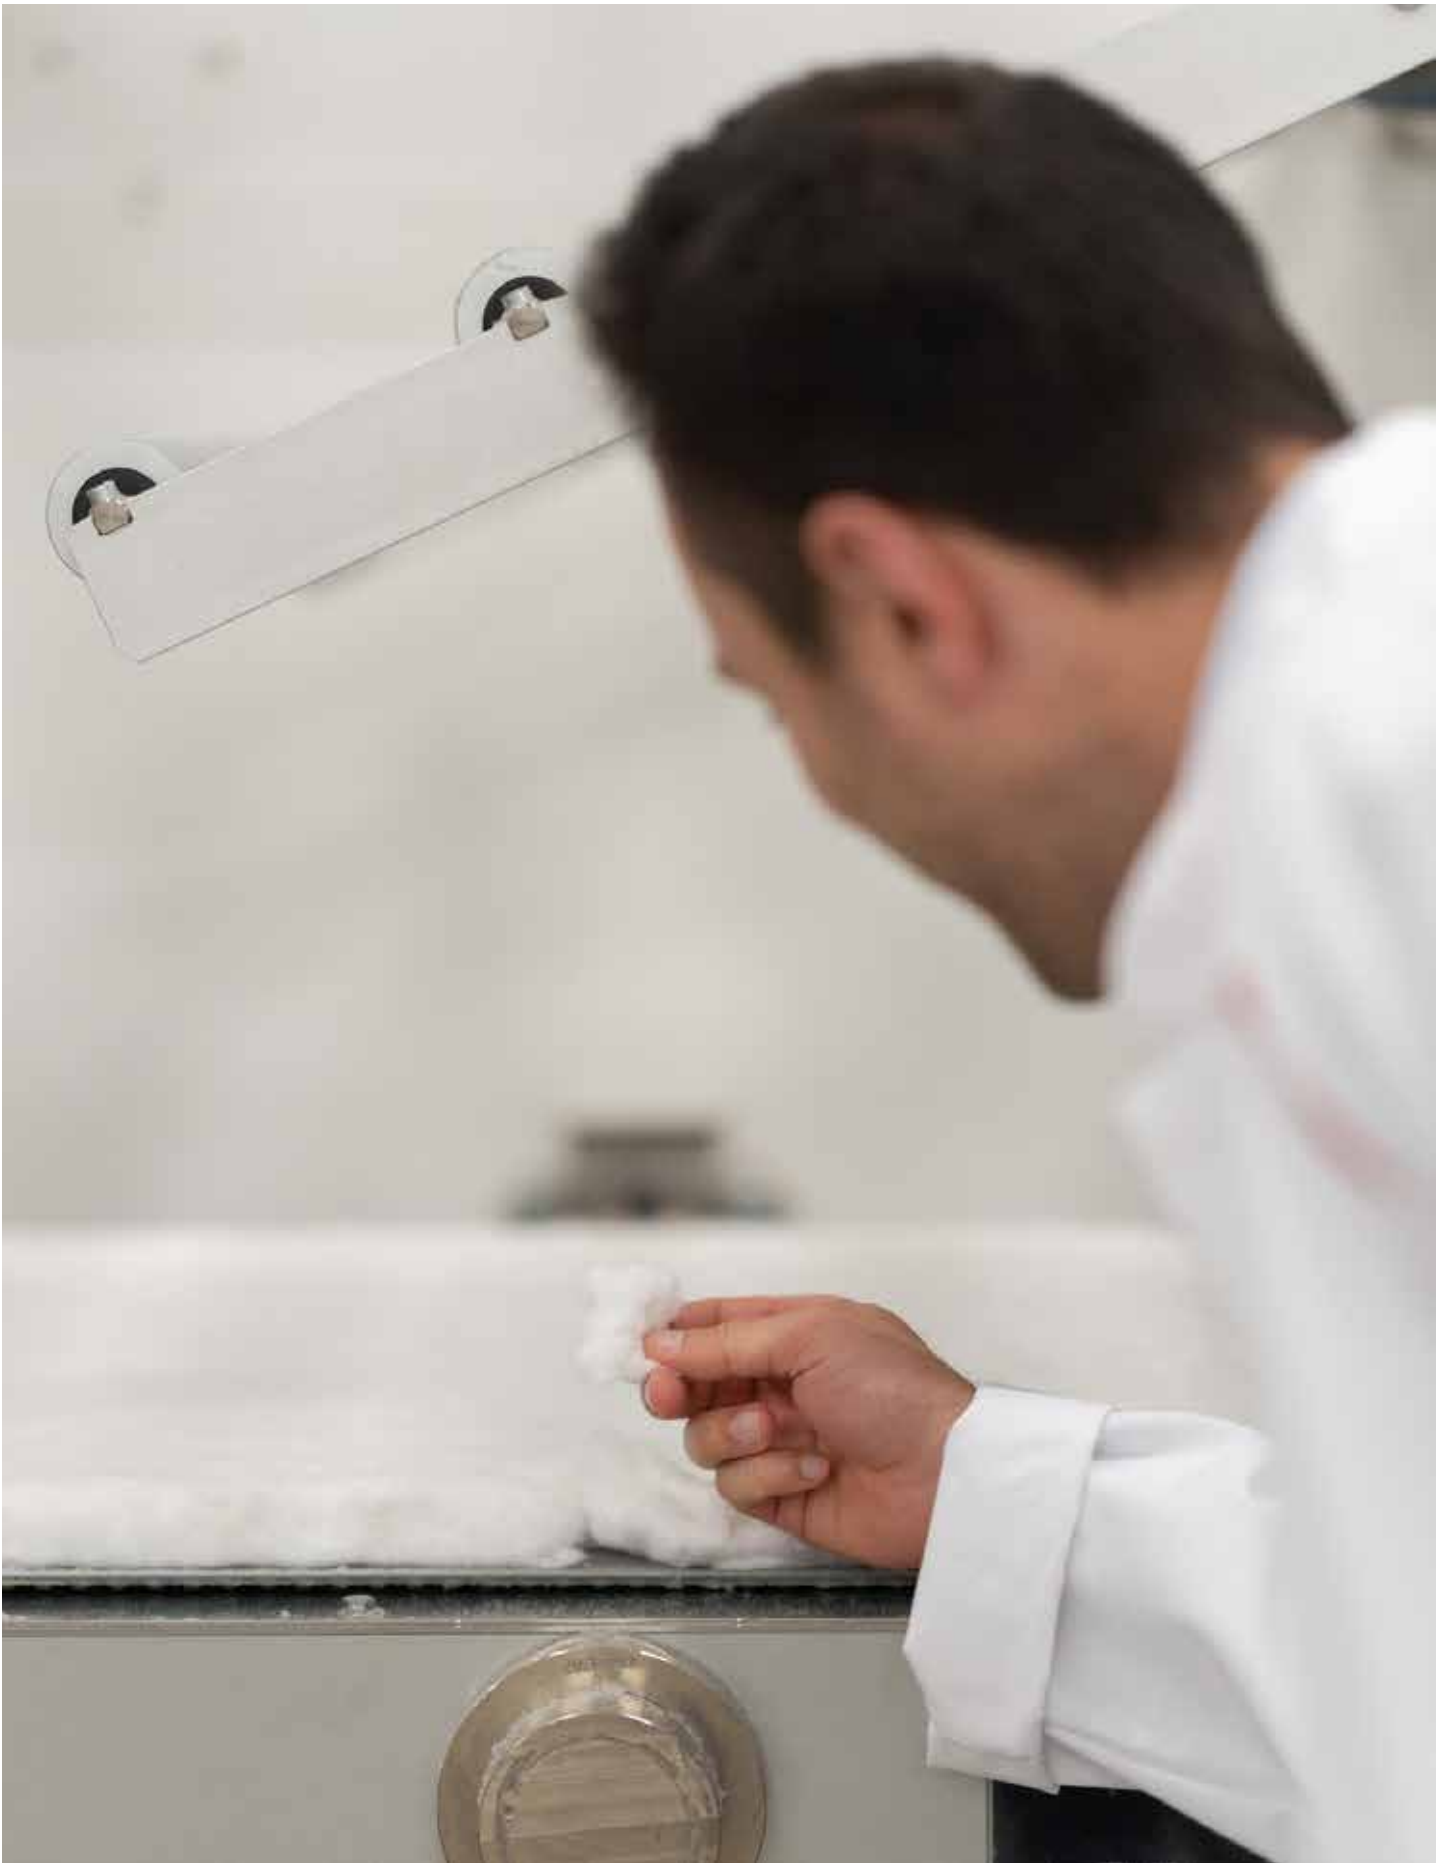

Additionally, these materials may be sourced from renewable resources, further reducing their environmental impact and promoting long-term sustainability in the packaging industry.

PLA

Polylactic acid (PLA) is a biodegradable polymer of lactic acid, which is produced via fermentation processes of sugar or starch (e.g. corn).

After this process, the lactic acid is polymerized into another polymer called Polylactic acid (PLA). The result is a white, translucent or clear bioplastic, made of 100% natural resources.

This material can be printed, and it's indicated suitable for cold drinks and and frozen foods.

Our PLA drinking cups are certified by DIN CERTCO according to EN 13432 norm. This means that the products should be biodegradable for 90% within a period of max 6 months under appropriate circumstances.

BIO PP

Bio-polypropylene is a cutting-edge, sustainable alternative to traditional polypropylene, perfect for tableware and food packaging.

Derived from renewable sources, this eco-friendly material offers the same durability, lightweight design, and heat resistance as standard polypropylene. It is food-safe, making it suitable for various applications, including hot and cold foods. With recyclability and reduced carbon emissions, bio-polypropylene is ideal for businesses prioritizing sustainability.

Whether used for stylish tableware or functional packaging, this innovative material combines environmental responsibility with outstanding performance, meeting the needs of modern consumers and eco-conscious brands.

PAPER WITH PE COATING

This high-quality paper with PE (polyethylene) coating is the ideal choice for crafting durable drinking cups and food packaging.

The PE layer provides excellent moisture and grease resistance, ensuring reliable performance for hot and cold beverages, as well as food products. Its lightweight yet sturdy structure ensures easy handling and enhanced product safety.

Designed for seamless printing and customization, this material offers versatility for branding and design needs. Eco-conscious and food-safe, this paper meets stringent quality standards, making it a reliable solution for food packaging while maintaining product integrity.

BAGASSE

Bagasse, a sustainable byproduct of sugarcane processing, is an eco-friendly raw material for plates, bowls, and food packaging. Known for its strength and heat resistance, it provides a sturdy and reliable alternative to traditional plastic or foam products.

Bagasse is biodegradable and compostable, aligning with environmentally conscious values. Its natural texture and smooth surface are ideal for stylish, food-safe tableware that performs well with both hot and cold foods.

Perfect for businesses aiming to reduce their environmental footprint, bagasse is the ultimate choice for durable, sustainable, and attractive disposable packaging.

PAPER WITH AQUEOUS DISPERSION

Elevate your eco-friendly packaging with paper featuring aqueous dispersion coating, a sustainable alternative to traditional coatings.

Specially engineered for drinking cups and food packaging, this material ensures excellent resistance to moisture and grease without compromising on biodegradability. Its smooth surface is perfect for vibrant printing and branding, while its food-safe properties guarantee consumer confidence.

Ideal for hot and cold applications, this material combines practicality and environmental responsibility, catering to businesses striving for greener solutions. It's the perfect raw material to support sustainability without sacrificing quality or performance.

WOOD

Crafted from high-grade, sustainably sourced wood, this raw material is perfect for producing cutlery. Known for its strength, smooth finish, and food-safe properties, it offers an eco-friendly alternative to plastic cutlery.

The wood is naturally biodegradable, supporting your commitment to reducing environmental impact. Lightweight yet sturdy, it ensures a comfortable and durable dining experience for customers.

Ideal for forks, knives, spoons and stirrers, this versatile material aligns with sustainability goals while maintaining the high quality demanded by modern consumers.

PP

Polypropylene (PP) is a versatile, lightweight raw material ideal for drinking cups and food packaging.

Its excellent durability and high-temperature resistance make it suitable for both hot and cold applications, ensuring reliable performance in diverse settings.

Polypropylene's food-safe properties and smooth surface allow for attractive printing and customization.

Additionally, this material is recyclable, offering an eco-conscious option for businesses seeking sustainable packaging solutions. Affordable and practical, polypropylene is a trusted choice for creating durable, cost-effective cups and packaging that maintain product quality and consumer satisfaction.

C-PET

C-PET is the premium choice for durable, heat-resistant food packaging solutions.

Known for its exceptional thermal stability, this crystallized polyethylene terephthalate material can withstand extreme temperatures, making it perfect for ready-to-eat meals and oven-safe trays. Its clarity and rigidity ensure excellent product presentation, while its recyclability supports sustainable packaging efforts.

Ideal for both hot and cold applications, C-PET meets food safety standards and delivers reliable performance for a variety of packaging needs. Choose C-PET for practical and environmentally conscious packaging solutions.

R-PET

R-PET is a recycled version of PET, commonly used in foodservice for items such as water bottles and salad containers.

This material provides a sustainable alternative to traditional plastic. We choose to use R-PET for our lids because it helps reduce plastic waste.

By incorporating recycled plastics, the industry decreases its reliance on virgin materials.

This approach supports environmental sustainability and promotes a circular economy.

PS

Polystyrene is a lightweight, versatile material widely used for crafting drinking cups, disposable cutlery, and plates.

Known for its rigidity and excellent insulation properties, it ensures a pleasant dining experience for both hot and cold items. Its smooth surface allows for easy printing and branding, making it an attractive choice for businesses.

Cost-effective and durable, polystyrene delivers dependable performance while meeting food safety requirements. Perfect for high-volume applications, this material is a practical solution for disposable foodservice products, balancing functionality and affordability.

PAPER CUPS

Our paper cups are designed with recyclable or compostable materials, such as paper with or without liner, making them a sustainable alternative to the classic plastics.

They are sturdy, lightweight, perfect for both hot and cold drinks and loved by most customers for its eco-feel and convenience.

DID YOU KNOW...

Did you know that kraft paper is perceived as more sustainable compared to white paper? Its unbleached production process often requires fewer chemicals and less energy.

HYGIENIC & SINGLE USE

Reduces contamination
risks, ensuring
a sanitary option

GOOD HEAT INSULATION

helps keep
beverages warm
without burning hands

COMPOSTABLE PAPER CUPS

Our compostable paper cup is a true innovation for 2025, designed with sustainability in mind.

Unlike traditional cups, it has no PE inner coating, making it fully compostable and environmentally friendly.

This breakthrough eliminates the need for plastic while maintaining durability and functionality.

As a result, our cup does not require the SUPD (Single-Use Plastics Directive) icon, reinforcing its eco-friendly credentials.

Manufactured in Barcelona, it reflects our commitment to local production and sustainable solutions.

Ideal for businesses looking to reduce their environmental impact, this cup offers a greener alternative without compromising quality.

With growing demand for sustainable packaging, our compostable cup sets a new standard in the industry, being able to serve completely waste-free.

COMPOSTABLE PAPER CUPS

VENDING CUPS

Polystyrene vending cups are a reliable and practical choice for serving hot and cold beverages in vending machines, offices, and cafés. Their rim-design ensures they stay securely stacked, and are easy to denest.

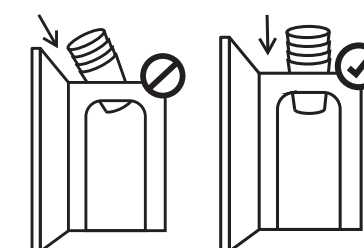

To protect this, we would like to inform you on how to load and unload them the right way.

When opening and extracting the packs from the case, always take special care to avoid damaging the rims of the cups. For example, remove the packs from the case vertically and

not at an angle; and then open the sleeves of the cups from the bottom.

When loading cups into the dispenser, make sure the cups are placed vertically.

DID YOU KNOW...

that polystyrene lids are the best choice for paper cups, offering a secure, leak-resistant fit and excellent insulation to keep drinks hot while protecting hands?

Unlike other (biodegradable) alternatives, they remain sturdy and maintain their shape without warping from heat or moisture.

DID YOU KNOW...

Reusable cups and plates are an excellent choice for celebrating parties, both for children and adults. Their durability prevents them from breaking easily, reducing the risk of accidents. In addition, they come in a wide variety of colours, allowing you to create a cheerful and themed table to match the celebration. They are easy to clean and can be used for multiple events, making them an economical option.

DID YOU KNOW...

Recyclable flutes offer numerous benefits for both indoor and outdoor events.

Safety-wise, they eliminate concerns about broken glass, making them ideal for busy gatherings and outdoor settings.

Their lightweight yet elegant design mimics real glass, ensuring a sophisticated touch without the fragility. Worry-free drinking experience.

HIGHLY TRANSPARENT
Glass-look

DID YOU KNOW...

That PP hot cups feature small ribbles on the side to prevent hands from burning?

These tiny ridges create an air gap between the cup and your fingers, providing extra insulation for a comfortable grip, protecting your fingers from the higher temperatures of hot drinks.

WASHING SERVICE

BRINGING REUSABLES BACK IN THE LOOP

A reusable cup system ensures sustainability while maintaining convenience for businesses and consumers alike.

When a drink is served in a reusable cup, customers enjoy their beverage with the added benefit of reducing waste.

Once used, the cups are collected at designated return points within the venue or through a larger collection network.

These cups are then transported to a professional washing facility, where they undergo thorough cleaning and sanitization.

Advanced washing technology ensures that each cup meets hygiene and safety standards, making them ready for reuse. After washing, the cups are carefully stored in hygienic

conditions until they are needed again. The cleaned cups are then redistributed to the same or other venues, completing a seamless circular system.

This process significantly reduces single-use waste while maintaining an efficient and reliable supply chain. Businesses benefit from cost savings and an enhanced eco-friendly image, attracting environmentally conscious customers.

The system is easy to implement and scale, making it an ideal solution for festivals, cafes, corporate events, and large venues.

NUPIK can be a valuable partner in supporting this system with high-quality, durable reusable cups designed for multiple washing cycles.

Additionally, deSter x nupik provides logistical support to ensure smooth operations from collection to delivery. With expertise in foodservice solutions, NUPIK helps businesses transition effortlessly to a more sustainable model.

This approach not only benefits the environment but also aligns with regulatory trends favoring waste reduction.

By choosing a reusable cup system with NUPIK, businesses contribute to a circular economy while maintaining high service standards and saving costs.

01 SERVE

Reusable cups are served at the event

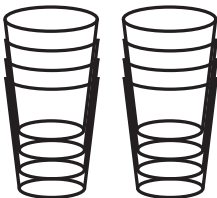

02 COLLECT

After the event, we collect the cups

05 REUSE

The cups are delivered at a new event

04 STORE

Washed and checked for future use, they are stored and available for new orders

03 WASH

The cups are washed in our facilities

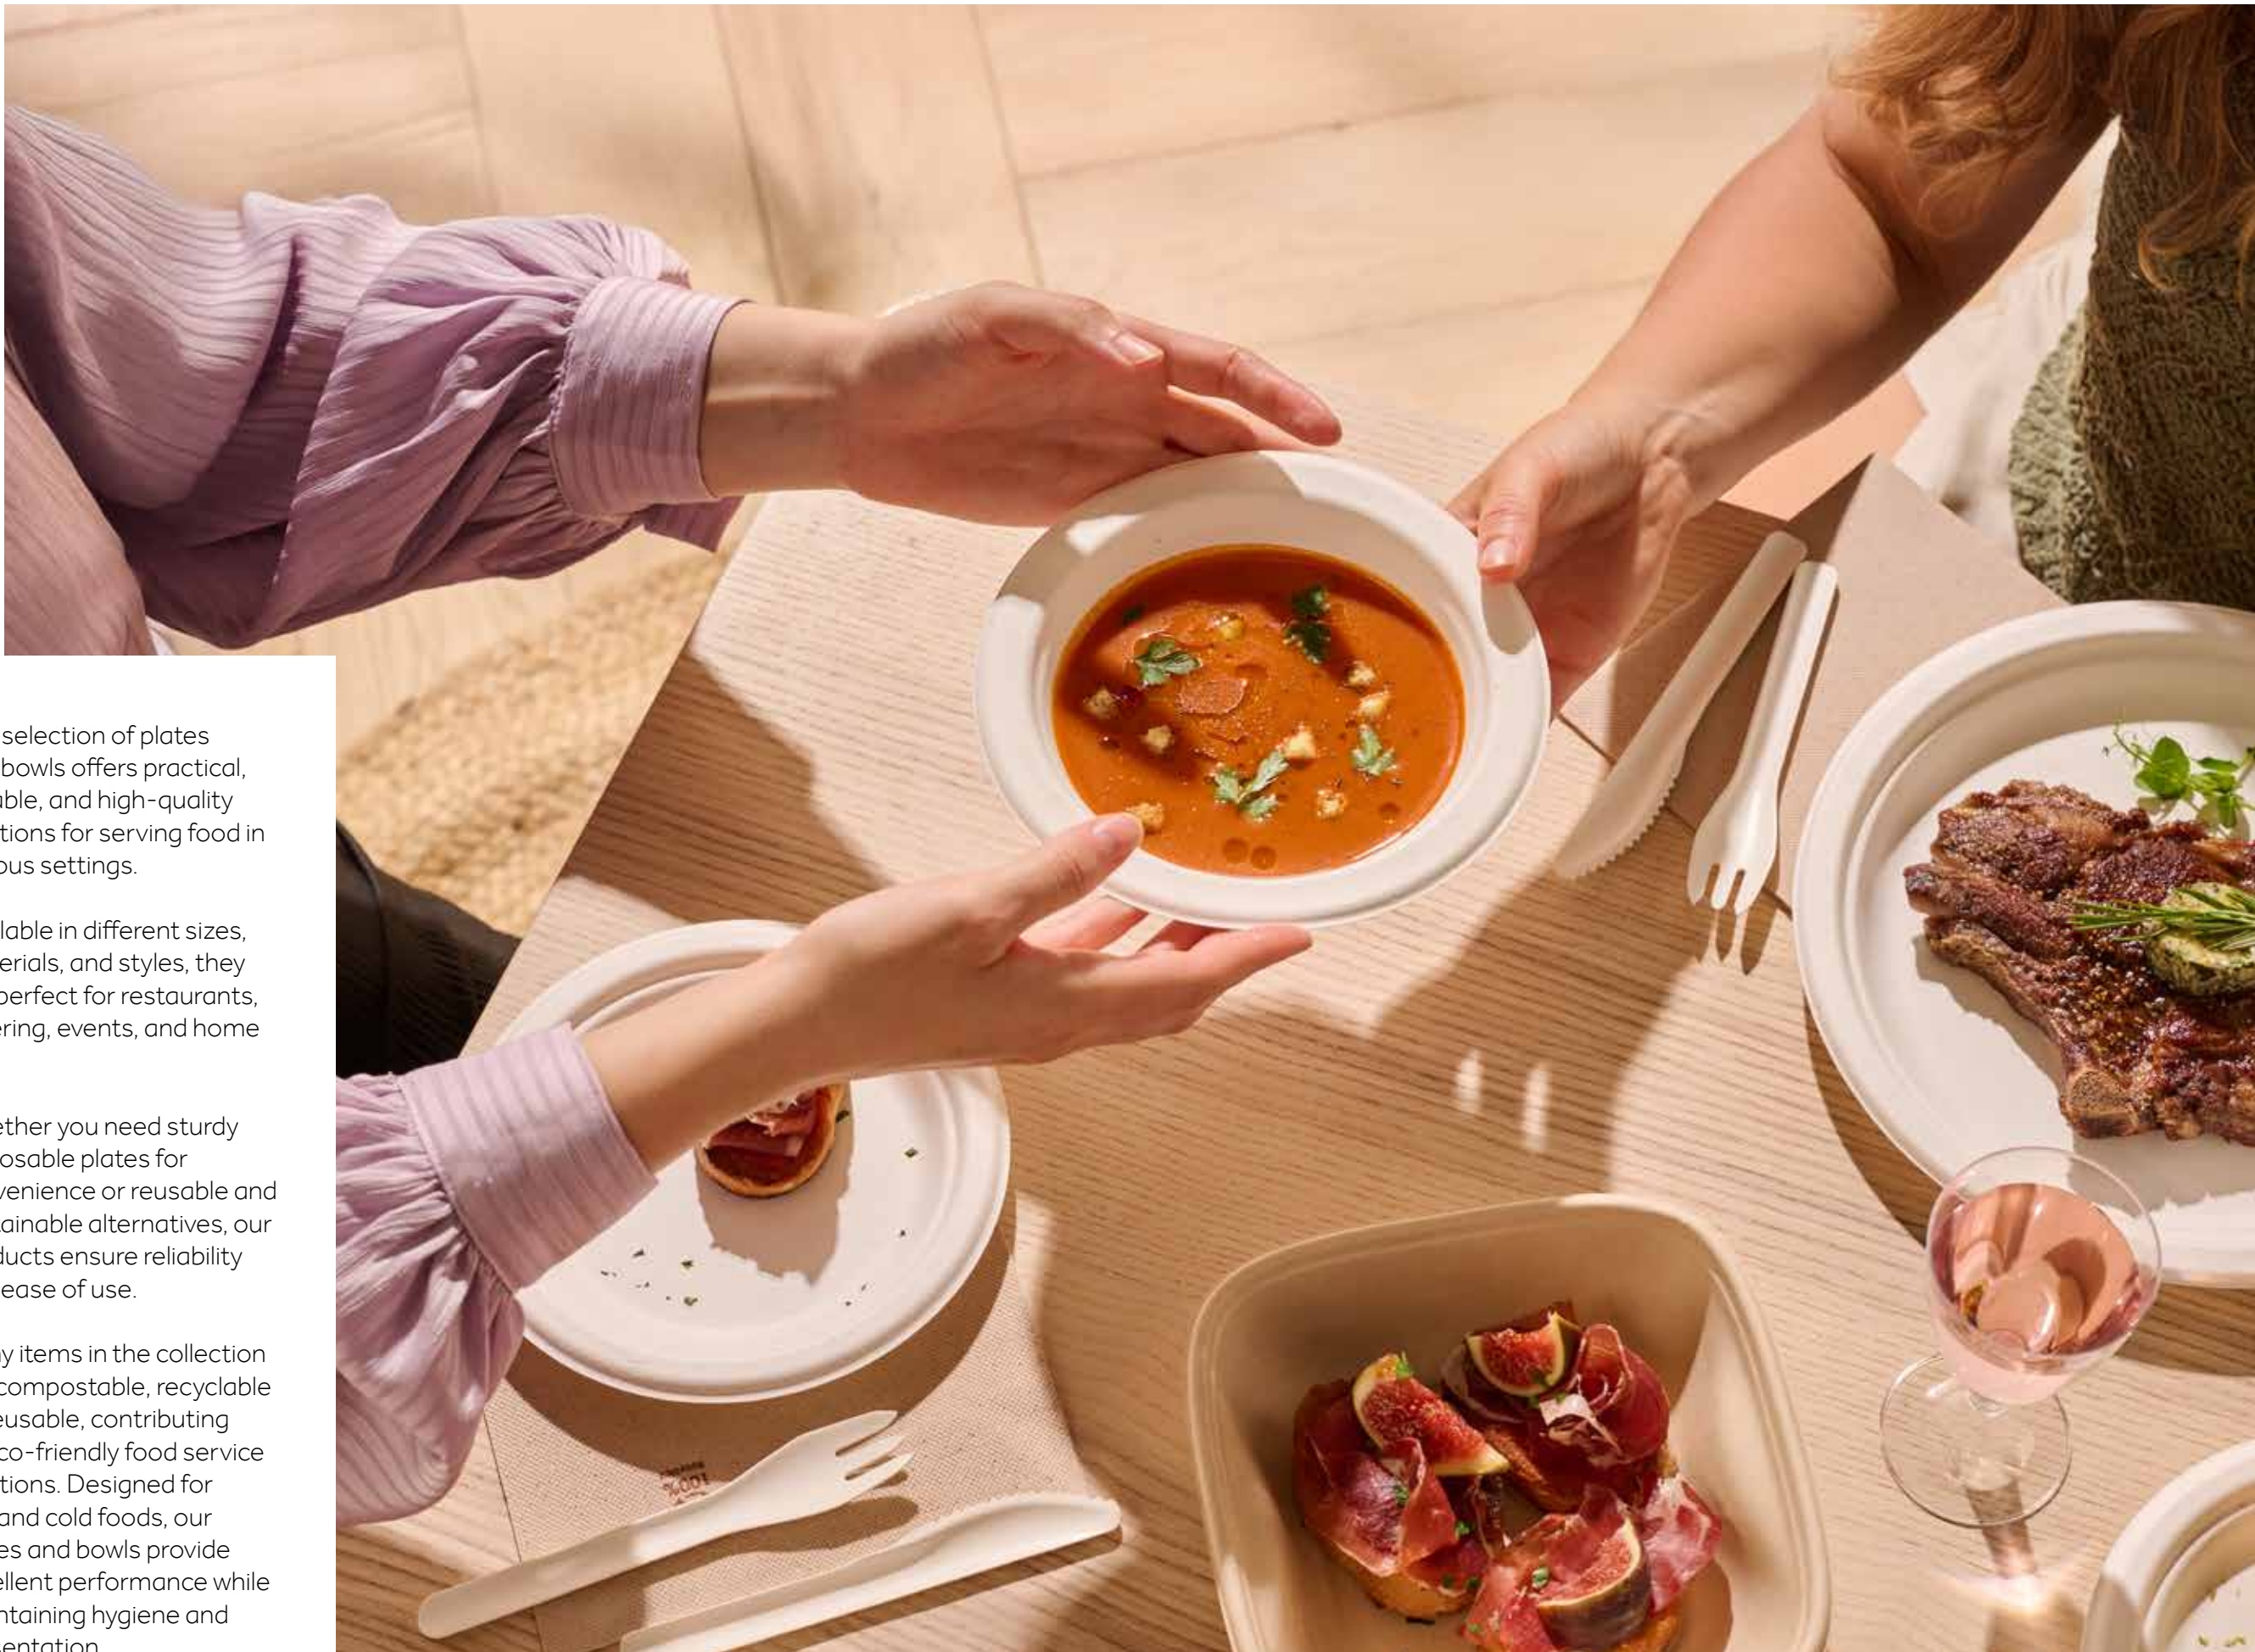

PLATES

Our selection of plates and bowls offers practical, durable, and high-quality solutions for serving food in various settings.

Available in different sizes, materials, and styles, they are perfect for restaurants, catering, events, and home use.

Whether you need sturdy disposable plates for convenience or reusable and sustainable alternatives, our products ensure reliability and ease of use.

Many items in the collection are compostable, recyclable or reusable, contributing to eco-friendly food service solutions. Designed for hot and cold foods, our plates and bowls provide excellent performance while maintaining hygiene and presentation.

PS PLATES

Polystyrene plates are a practical and versatile choice for serving food in any setting, from casual gatherings to large events.

They are lightweight yet sturdy, making them easy to carry while holding a variety of meals without bending or breaking.

Their smooth, non-porous surface prevents liquids and oils from soaking through, keeping tables clean and mess-free.

They come in various sizes and designs, making them suitable for everything from appetizers to full-course meals.

The classic white finish offers a clean, professional look that complements any dining setup.

Because they are stackable, they save space in storage and make setup and cleanup effortless.

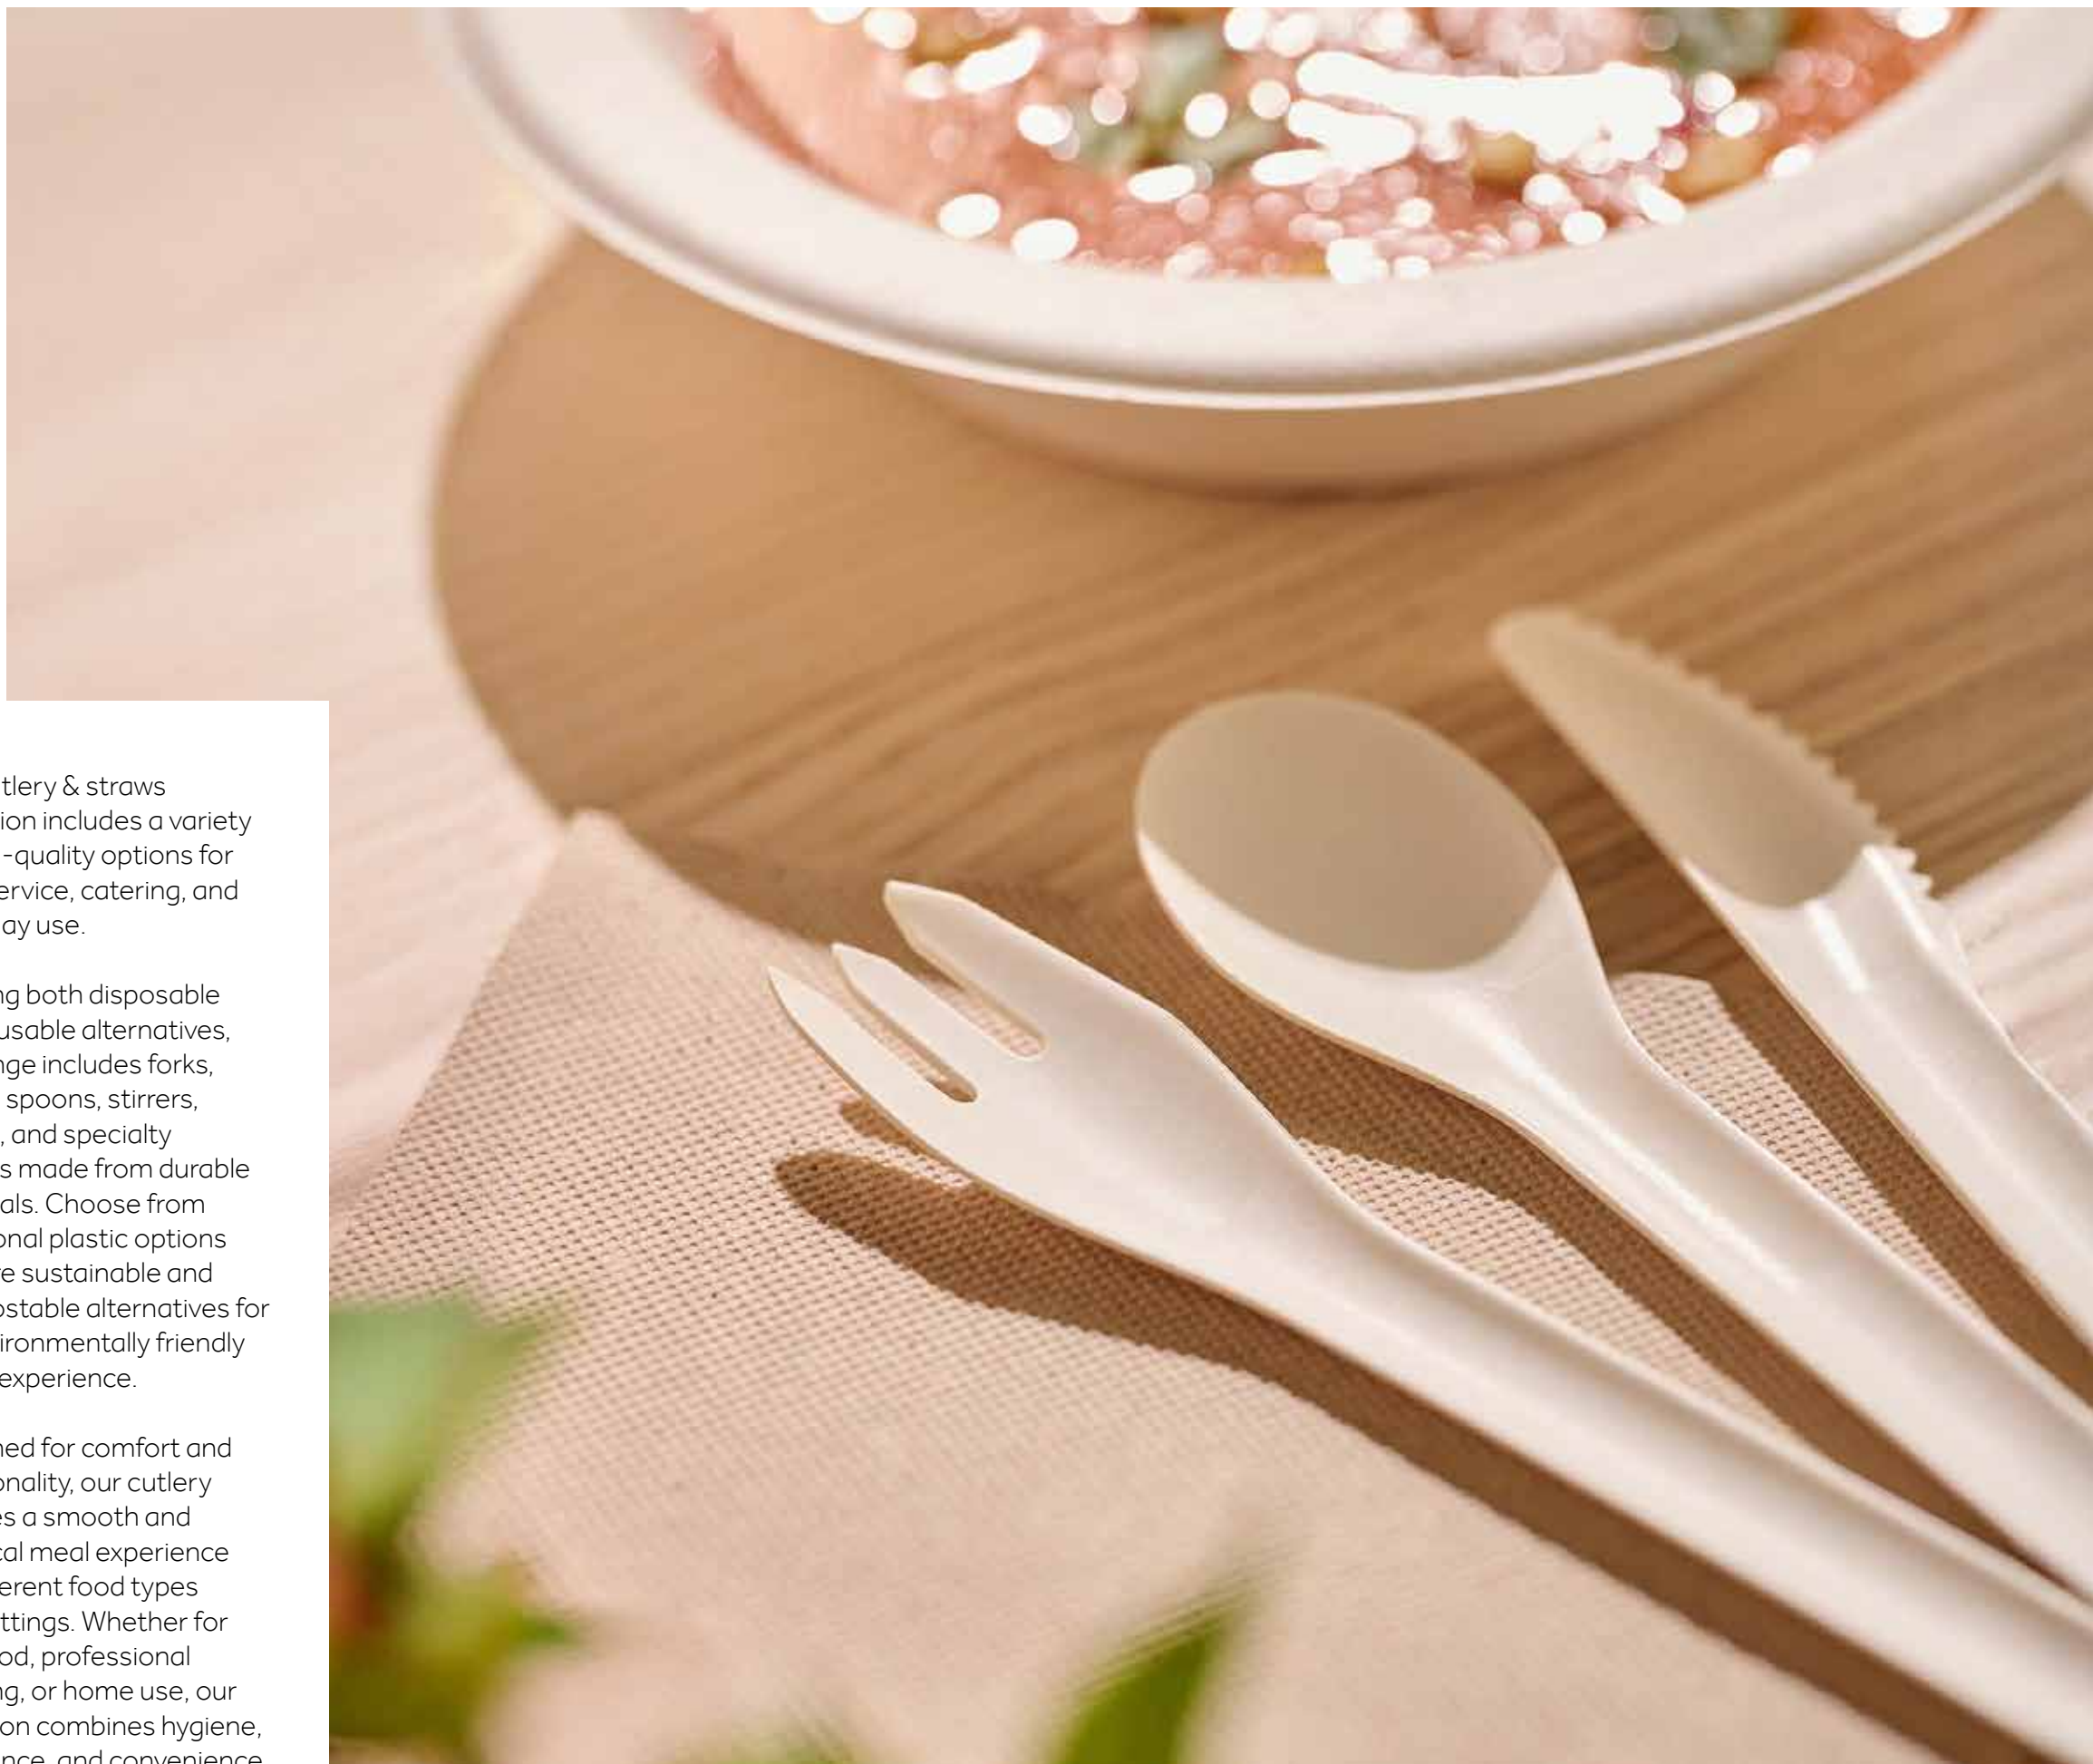

Additionally, polystyrene plates are cost-effective, providing an affordable yet reliable solution for large- and small- scale food service.

CUTLERY & STRAWS

Our cutlery & straws collection includes a variety of high-quality options for food service, catering, and everyday use.

Offering both disposable and reusable alternatives, the range includes forks, knives, spoons, stirrers, straws, and specialty utensils made from durable materials. Choose from traditional plastic options or more sustainable and compostable alternatives for an environmentally friendly dining experience.

Designed for comfort and functionality, our cutlery ensures a smooth and practical meal experience for different food types and settings. Whether for fast food, professional catering, or home use, our selection combines hygiene, resistance, and convenience.

DID YOU KNOW...

Our wooden cutlery stands out for its high performance compared to other wooden types, offering durability and reliability with every use. We meticulously inspect each piece, searching for abnormalities like splinters or color differences, and filter these out to ensure only the highest quality products. This attention to detail ensures our wooden cutlery is smooth, uniform, and ready to perform at its best.

MATER - BI

Mater-Bi is a high-performance, biodegradable material made from renewable plant-based sources, offering an eco-friendly alternative to traditional plastics.

This innovative material is primarily derived from corn starch, ensuring that it is not only sustainable but also compostable.

Mater-Bi products break down naturally in the environment, reducing plastic waste and supporting a circular economy. It is commonly used in the production of bags, food packaging, and various other disposable items, offering a

practical and eco-conscious choice for businesses and consumers alike.

Unlike conventional plastics, Mater-Bi doesn't release harmful toxins during its degradation, making it safe for both humans and the planet.

The material also maintains strength and flexibility, offering the same performance as plastic.

In addition to its environmental benefits, Mater-Bi is versatile and can be customized for different applications, enhancing its appeal to a wide range of industries.

DID YOU KNOW...

that our straws outlast most alternatives on the market? Made from high-quality, durable paper, they maintain their strength and integrity, even in thicker beverages like smoothies and milkshakes. Unlike some competitors, our straws are resistant for a longer period of time to sogginess, allowing you to enjoy your drink without worrying about them breaking down too quickly.

ECO-FRIENDLY
made of renewable
resources as natural paper
fiber, glues composed of
soy / vegetable oils and
food- grade inks

STRONG MATERIAL
long lasting

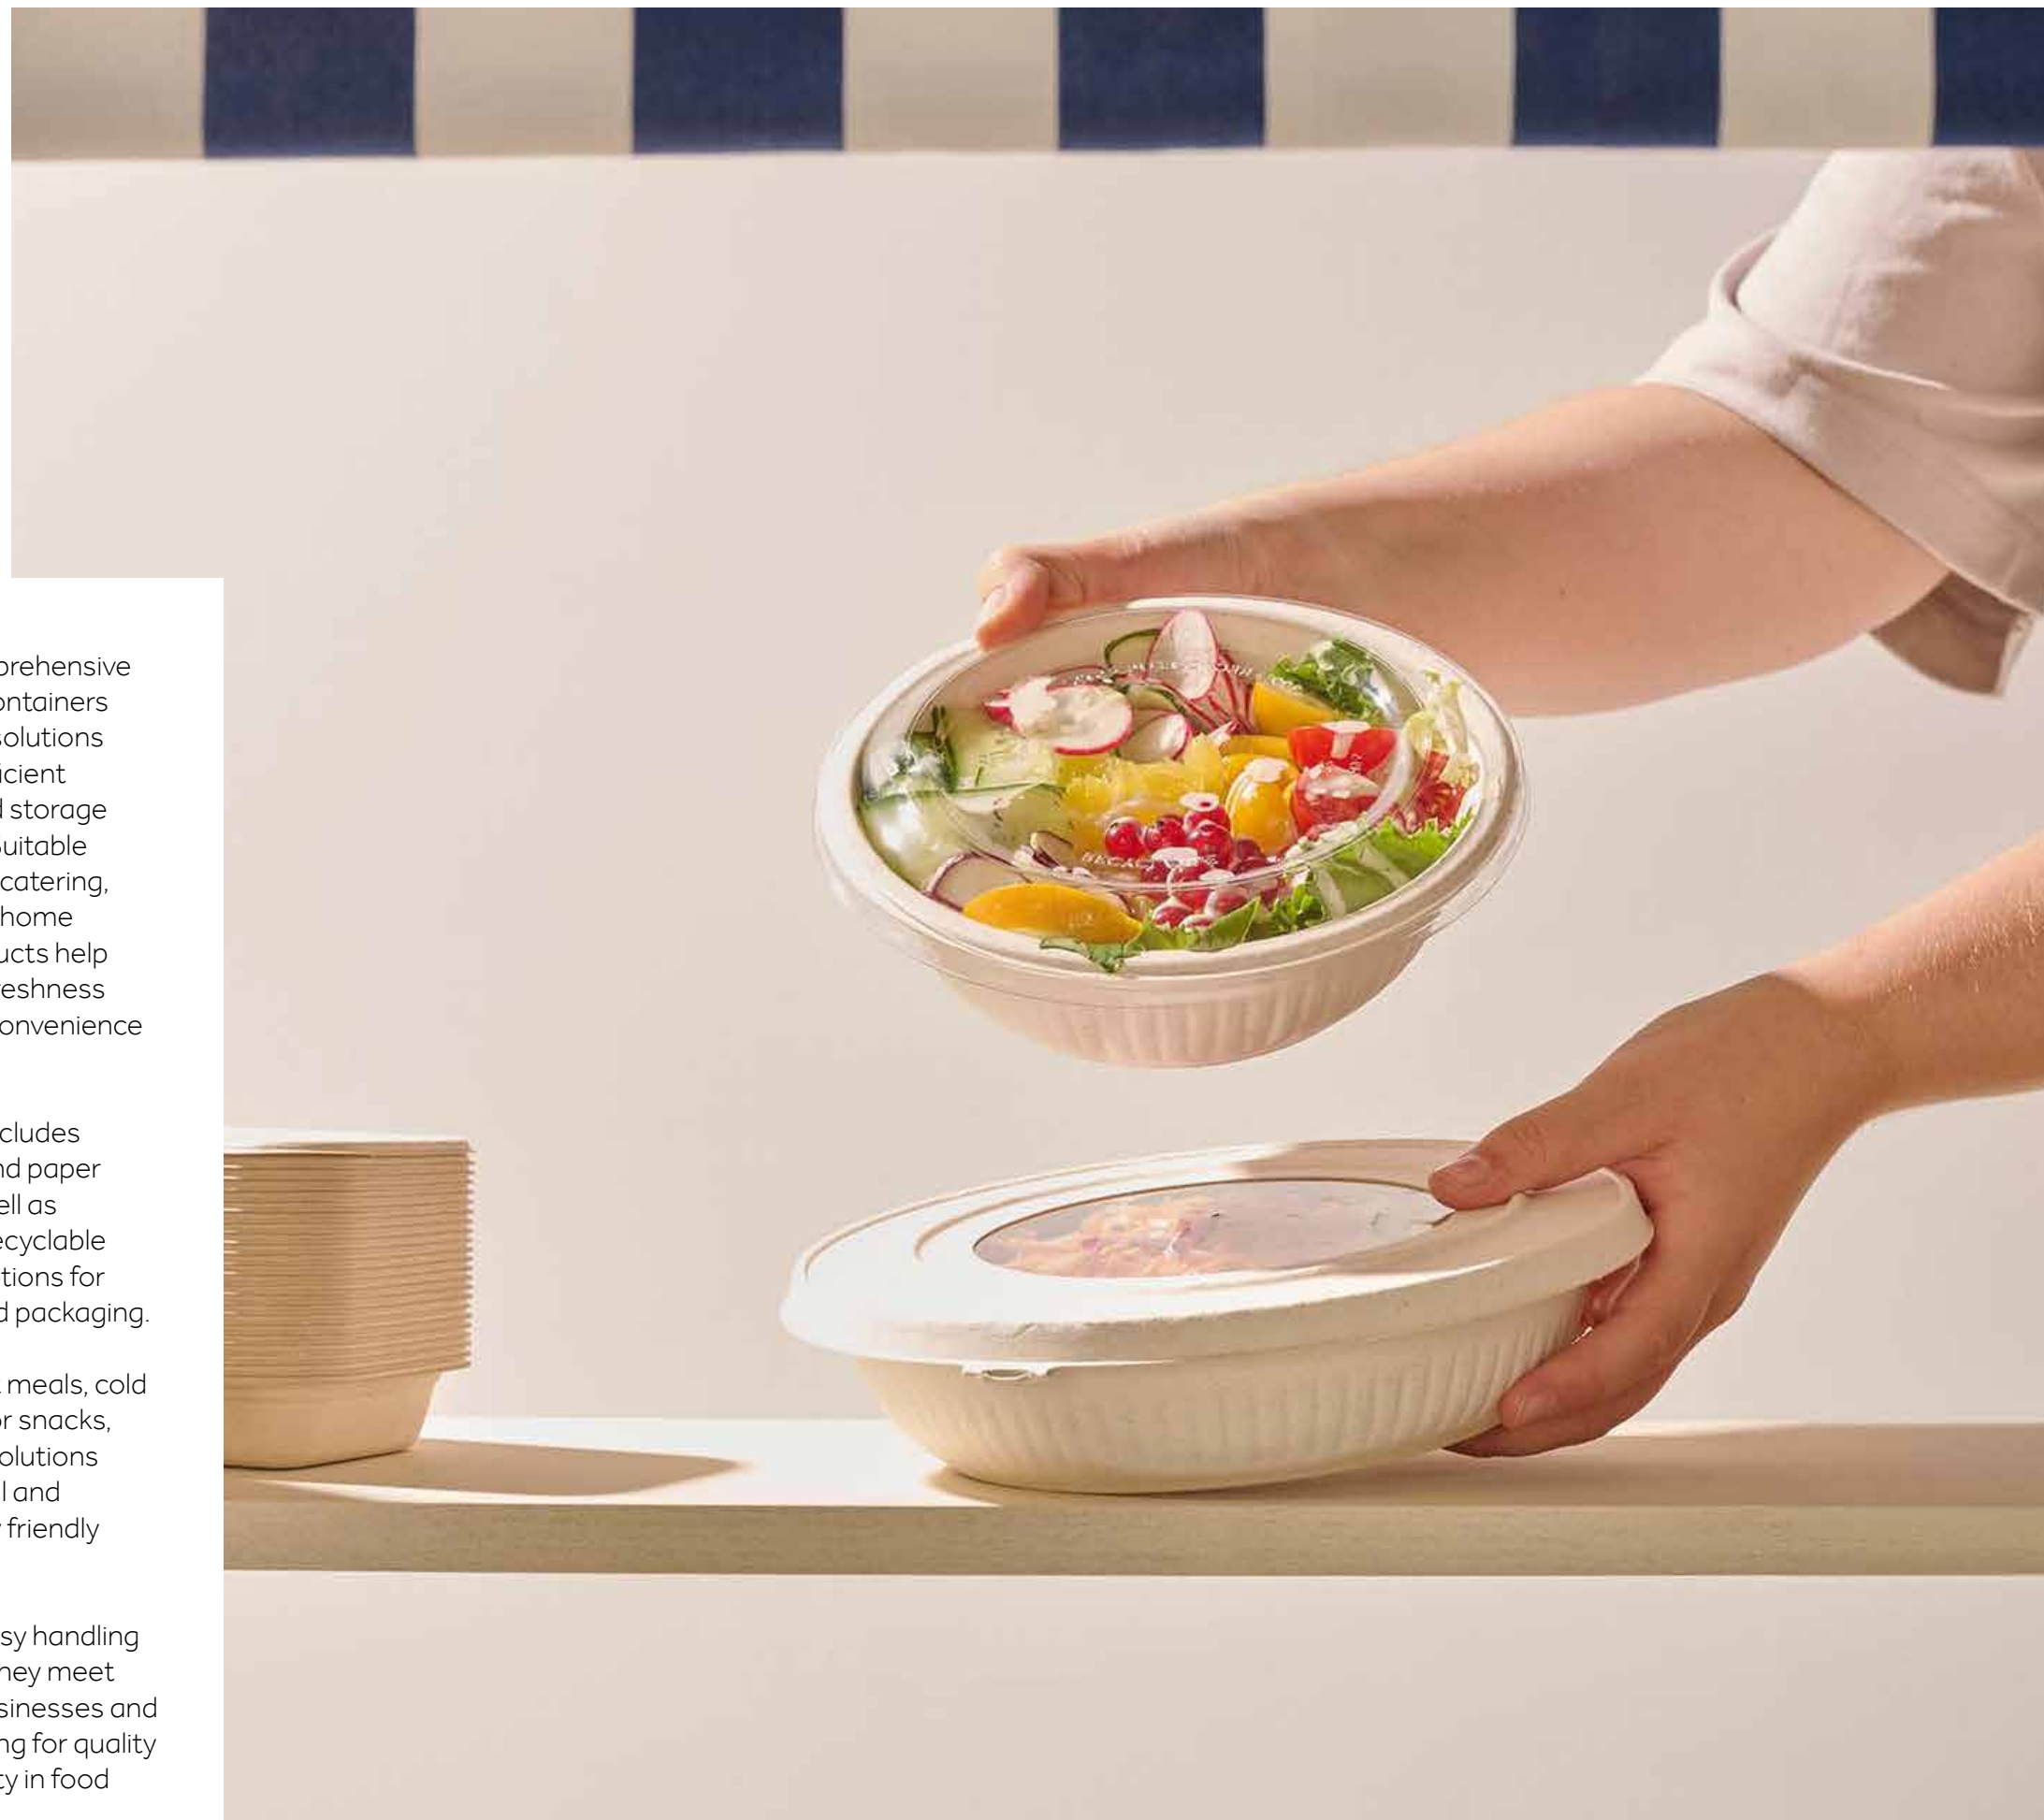

FOOD CONTAINERS

Discover a comprehensive range of food containers and packaging solutions designed for efficient and secure food storage and transport. Suitable for restaurants, catering, takeaways, and home use, these products help preserve food freshness while ensuring convenience and hygiene.

The selection includes sturdy plastic and paper containers as well as compostable, recyclable and reusable options for sustainable food packaging.

Whether for hot meals, cold dishes, salads, or snacks, our packaging solutions provide practical and environmentally friendly options.

Designed for easy handling and transport, they meet the needs of businesses and individuals looking for quality and sustainability in food service.

BAGASSE

Bagasse bowls are an eco-friendly alternative to traditional plastic or foam containers, made from the natural byproduct of sugarcane.

These biodegradable bowls are sturdy, durable, and designed to hold both hot and cold foods without compromising their integrity.

Unlike plastic, bagasse is a renewable resource, making these bowls a more sustainable choice for environmentally conscious consumers.

Their natural composition means they break down quickly in composting

environments, leaving minimal impact on the planet.

Bagasse bowls are microwave-safe, leak-resistant, and perfect for everything from salads to soups or takeout.

The versatility of these bowls makes them ideal for both casual and formal occasions.

We also offer plastic lids that fit seamlessly, for spill- proof take-out and delivery meals.

NO ADDED PFAS
environment-friendly

COMPOSTABLE
made from sugarcane fiber,
decomposing naturally

DID YOU KNOW...

that our bagasse clamshells are designed to stack perfectly, whether they are open or closed? This thoughtful design ensures optimal use of space, making storage and transportation more efficient.

The result is a more organized, streamlined process, enhancing both convenience and speed for your business.

SECURE CLOSING
clamshell design prevents spills and maintains food freshness during transport

STURDY & DURABLE
resistant to grease, moisture, and heat, making them ideal for various foods

REUSABLE REVOLVE BOWLS

Revolve PP bowls are a stylish and practical solution for serving both hot and cold food.

Their tight-fitting lids ensure a secure seal, preventing spills and making them perfect for food on the go.

Available in a range of trendy colors, they add a modern touch to any meal presentation.

These bowls are easy to wash and reusable, and even designed to be re-used up to 500 times, making them a more sustainable option compared to traditional disposable containers.

Their durable PP construction allows them to be used in restaurants, cafes, and takeout services with confidence. Guaranteed that they won't warp or bend due to the sturdy material.

Whether for dine-in meals or takeaway orders, they offer both functionality and style. With Revolve PP bowls, you get a reliable, leak-proof, and visually appealing food packaging solution.

CELLULOSE

Our high-quality napkins combine exceptional softness, durability, and sustainability, making them the perfect choice for restaurants, catering, events, and home use.

Designed for superior absorbency and comfort, they provide an excellent dining experience while maintaining high hygiene standards.

Available in a variety of sizes, colors, and materials, our napkins cater to different needs, from casual settings to elegant dining. Sustainability is at the core of our selection, with eco-friendly options including napkins made from responsibly sourced materials.

While prioritizing quality and environmental responsibility, we also ensure competitive pricing, offering the best value without compromising performance.

Whether for everyday use or special occasions, our napkins deliver a perfect balance of functionality, aesthetics, and sustainability.

DID YOU KNOW...

Micro-embossing in napkins enhances their texture, making them softer and more absorbent.

The fine patterns create small air pockets that improve moisture absorption, ensuring better performance. This technique also adds a premium look, giving napkins a more elegant and refined appearance.

DID YOU KNOW...

that our refreshing towels come with a disinfecting liquid, making them not only perfect for freshening up but also effective in eliminating germs for added hygiene and protection?

COLOR RANGE

Bright, colorful tableware brings energy and excitement to any event!

Our cups, plates, and napkins in bold, vibrant hues let you create a fun and lively atmosphere. Whether you're throwing a cheerful party or showcasing your brand's signature colors, we have the perfect shades for you.

Choose from eye-catching reds, blues, greens, and more to make your table pop. Our standard bright color ranges make it easy to mix and match for any occasion. A coordinated, colorful setup adds a polished look with minimal effort.

Plus, our tableware isn't just stylish—it's also durable and practical for worry-free use. Our sturdy plates, reliable cups, and absorbent napkins ensure your event runs smoothly. Whether it's a birthday, festival, or corporate event, bold colors set the perfect tone.

Ditch the dull and embrace the bright for a truly unforgettable celebration.

BRANDING

Looking to elevate your brand and leave a lasting impression?

Customized cups and food packaging are the perfect way to showcase your creativity while reinforcing your brand identity.

At deSter x nupik, we specialize in high-quality, tailor-made packaging solutions that bring your vision to life.

With years of expertise in customization, we help businesses stand out in a crowded market.

Whether you run a coffee shop, restaurant, or catering service, our personalized cups and food containers ensure your brand is front and center with every sip and bite.

Our team combines innovative design, premium materials, and expert craftsmanship to deliver packaging that not only looks great but also enhances the customer experience.

Custom packaging creates a strong visual impact, builds brand recognition, and turns every order into a marketing opportunity.

Let's turn ordinary packaging into a powerful branding tool!

Contact us and discover how our customization expertise can take your business to the next level.

THE IMPORTANCE OF BRANDING

IN-HOUSE DESIGN AND CUSTOMIZATION OPTIONS

Branding is the personality of your product, shaping how customers perceive and connect with it.

It's more than just a sticker on the package—it's what influences decisions and builds lasting relationships. Just like a sauce adds flavor to a dish, branding gives your product its unique identity.

Packaging serves as the first interaction between your product and the buyer, setting the tone for their experience. A well-branded package doesn't just attract attention; it tells a story of trust, quality, and reliability.

More than just a logo, it represents a promise that customers can rely on. Customization plays a key role in making your brand stand out, which is why we

offer a variety of options to fit your needs. We are happy to guide you through every detail of the production process, including costs, minimum order quantities, and recyclability choices.

Thoughtful branding and packaging create a strong impression that goes beyond a single purchase. By investing in the right branding strategy, businesses can build trust, recognition, and long-term customer loyalty.

As your partner, we can provide you with a wide range of different customization options.

When you find this icon on an item, it means the product is customizable.

DRY-OFFSET PRINT

CHEAP AND FAST

Dry offset printing is a ideally method for decorating plastic cups, including both thermoformed and injection-molded ones, and paper cups.

Additionally, the ability to print directly onto curved surfaces makes dry offset printing a practical and economical choice for large-scale production.

This process is an indirect printing technique where ink is transferred from a plate to a blanket and then onto the plastic surface. It is particularly effective for high-speed production runs, offering precision and high-definition images with sharp color separations.

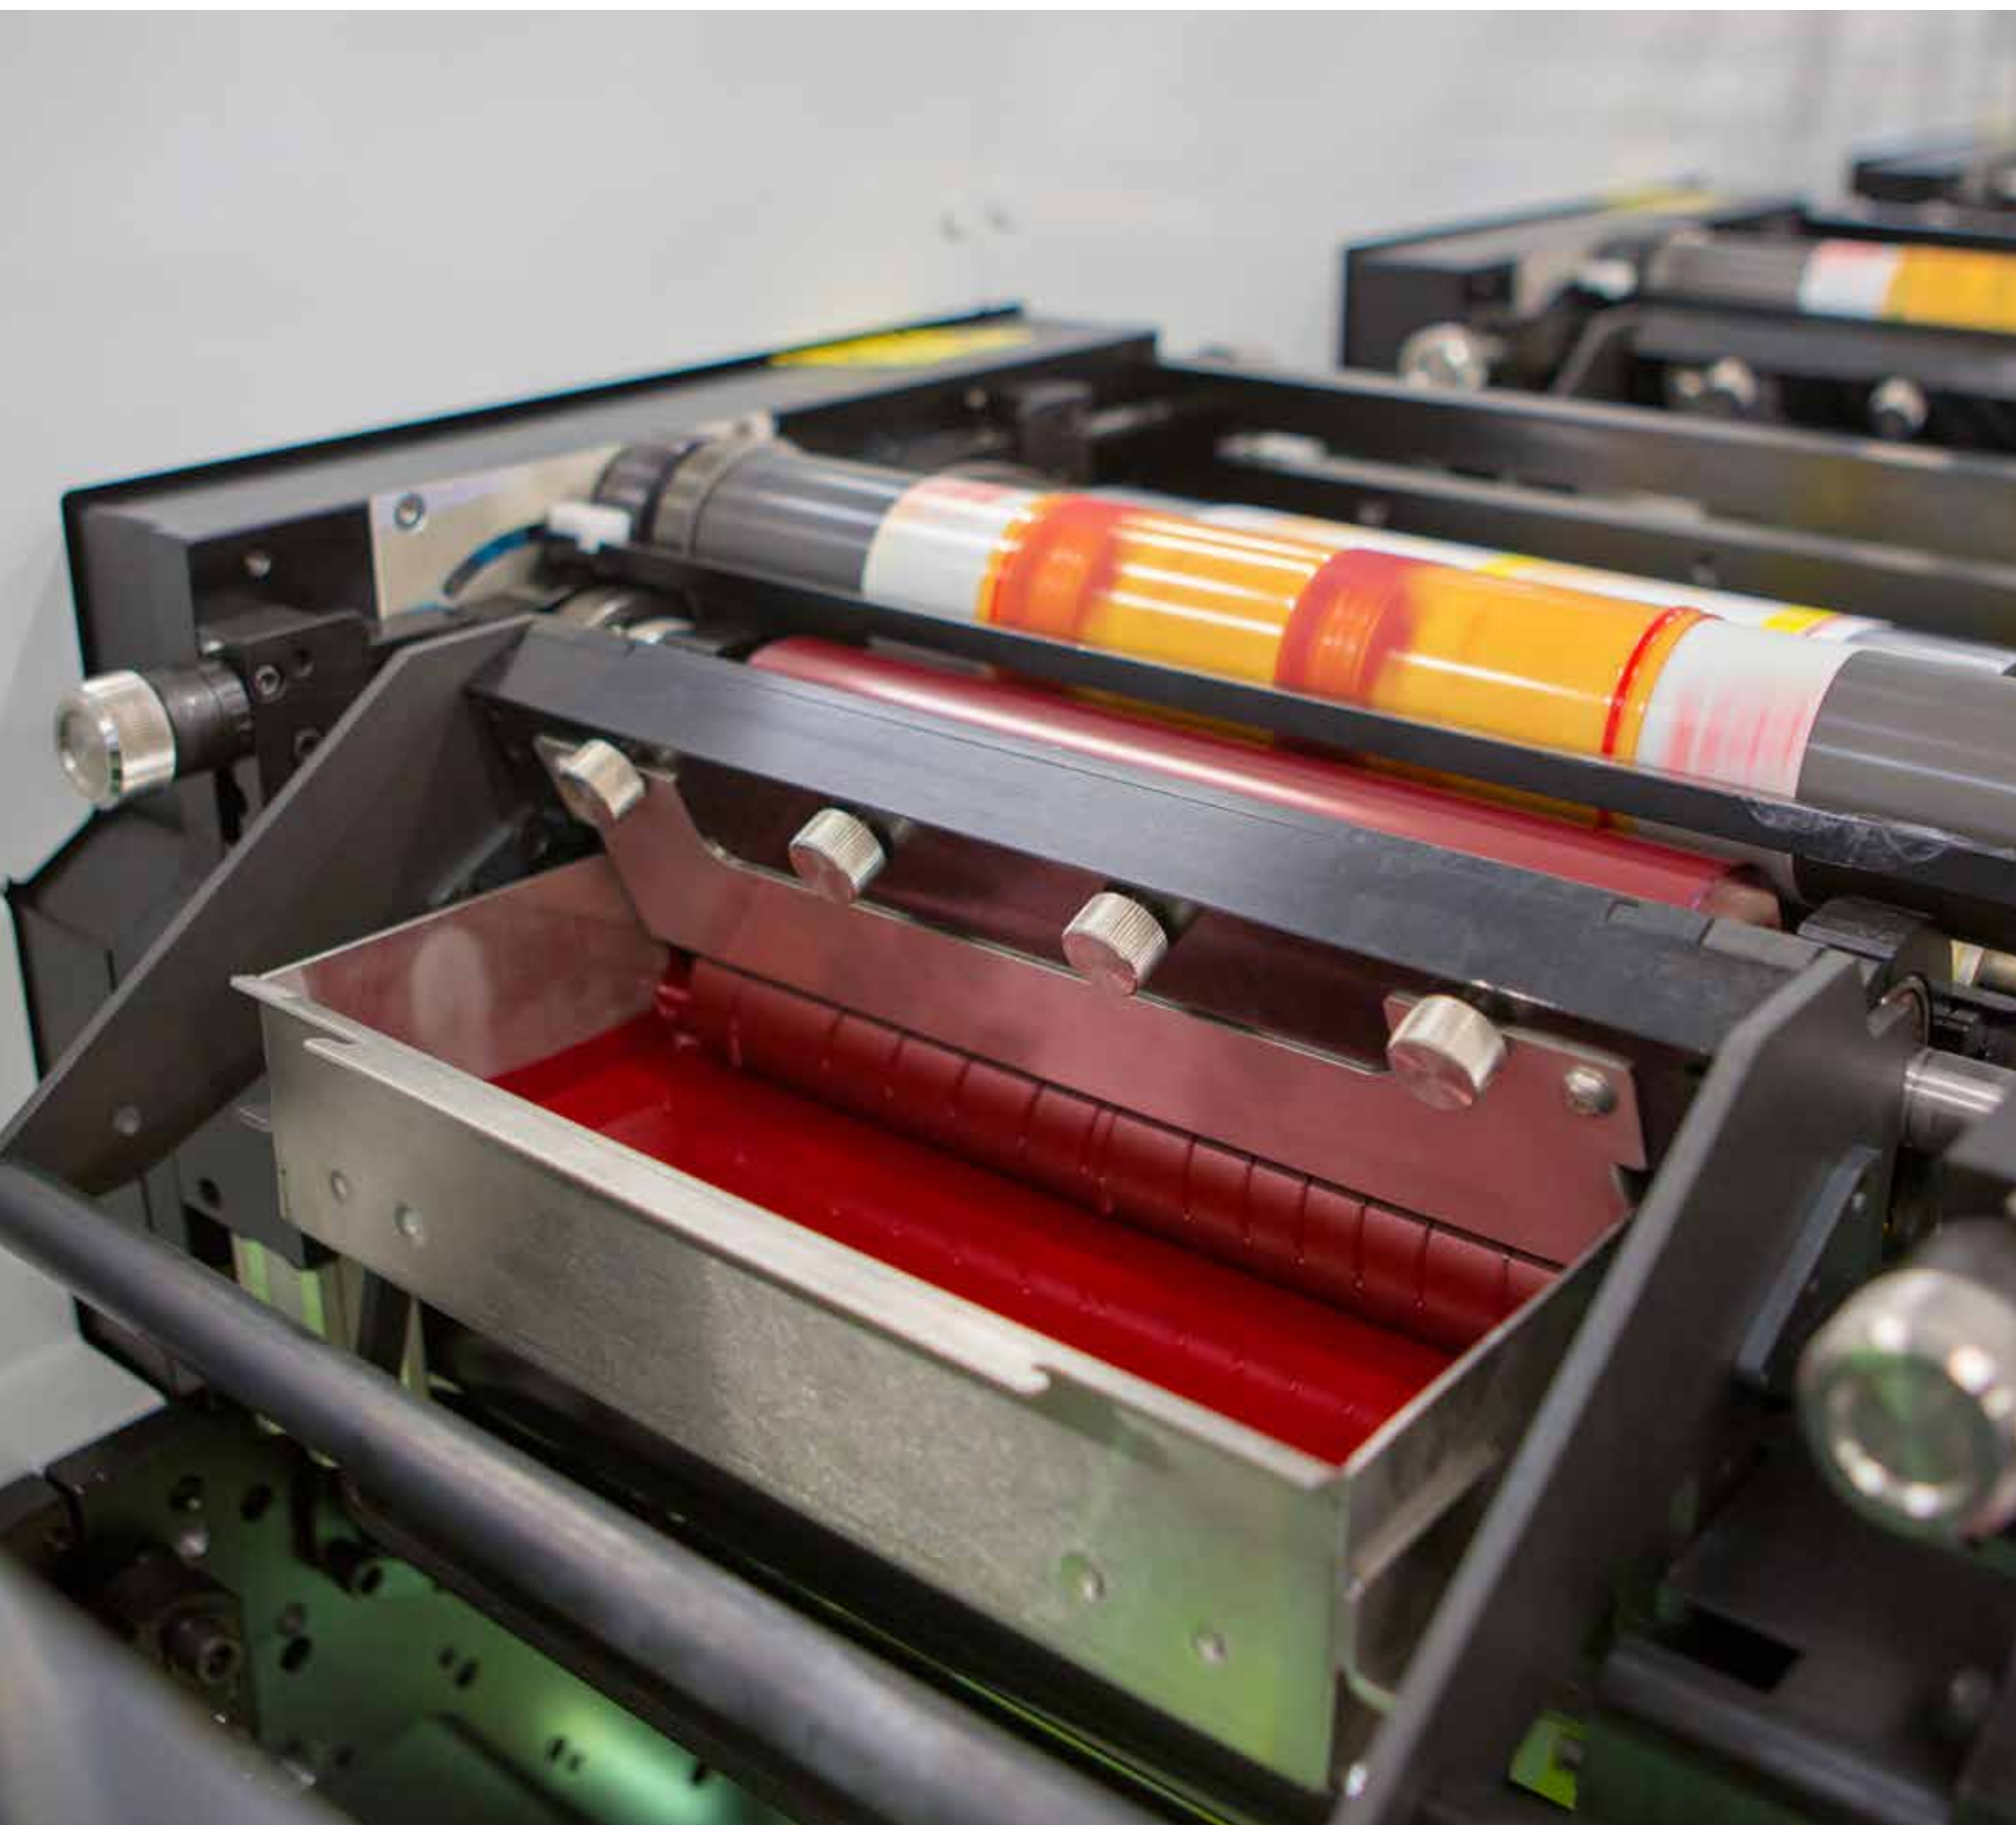

Dry offset printing allows for multiple colors to be printed in a single pass, improving efficiency and reducing waste.

Since it does not require the use of water, it is ideal for plastic substrates, preventing smudging and ensuring quick drying.

⊗ Up to 6 colors

Print is done on top of the produced cups, therefore the productivity is higher and the price is more competitive.

FLEXOGRAPHIC PRINT

EFFICIENT AND ECO-FRIENDLY PRINT ON PAPER AND NAPKINS

Flexographic printing is a widely used technique for printing on paper cups, offering high-quality results with efficient production speeds.

This method utilizes flexible relief plates to transfer ink onto various substrates, making it ideal for large-scale applications.

Flexo printing is known for its ability to produce vibrant, consistent colors while accommodating water-based and food-safe inks, ensuring compliance with hygiene regulations.

Flexographic printing allows for quick drying and cost-effective printing, even for complex designs. Its versatility enables the use of multiple colors and intricate graphics, ensuring high-definition branding on disposable paper products.

Given its adaptability, flexographic printing is widely adopted looking to produce eco-friendly, recyclable, and biodegradable packaging while maintaining efficiency and reducing production costs.

⊗ Up to 6 colors

Print is done on the paper before the cup is produced, therefore, the entire surface of the cup can be printed.

STAMPA

DURABLE BRANDING

Stampa printing is ideal for businesses seeking to create branded plastic with crisp, durable designs.

Stampa printing can accommodate single color logos, ensuring high visibility and aesthetic appeal, for example, is excellent for bold, opaque designs.

The versatility of stampa printing enables customization for promotional events, corporate branding, and retail packaging.

This method ensures a strong bond between the ink and the plastic surface, enhancing durability against moisture and frequent

⊗ Up to 1 color

LASER

INK-FREE = CARE- FREE CLOSED LOOP

Laser engraving is a cutting-edge technique used to etch logos and designs onto plastic cups with precision and durability.

Unlike traditional printing methods, laser engraving does not involve ink but instead uses a high-powered laser to remove the top layer of the surface, creating a permanent mark.

This process offers a sleek, high-end finish that is resistant to wear, moisture, and fading. It is an excellent option for reusable plastic cups, as the engraving remains intact even after multiple washes.

Laser engraving is commonly used for corporate branding, event souvenirs, and personalized drinkware, ensuring a professional and sophisticated look.

Since it does not require consumables like ink or labels, it is an eco-friendly and cost-effective solution for long-term branding.

While it is not ideal for full-color designs, laser engraving excels in providing a refined, tactile finish that enhances brand recognition and product appeal.

⊗ Up to 1 color in grey-shade. No inks are used.

IML

LOW-COST 360 DESIGN

In-Mold Labeling (IML) is an advanced printing technique used for injecting plastic cups, integrating the label directly into the molding process.

Unlike traditional printing methods, where the design is applied post-production, IML embeds a pre-printed label within the plastic during the injection molding phase. This ensures superior durability, resistance to moisture and scratches, and high-quality graphics with photographic precision.

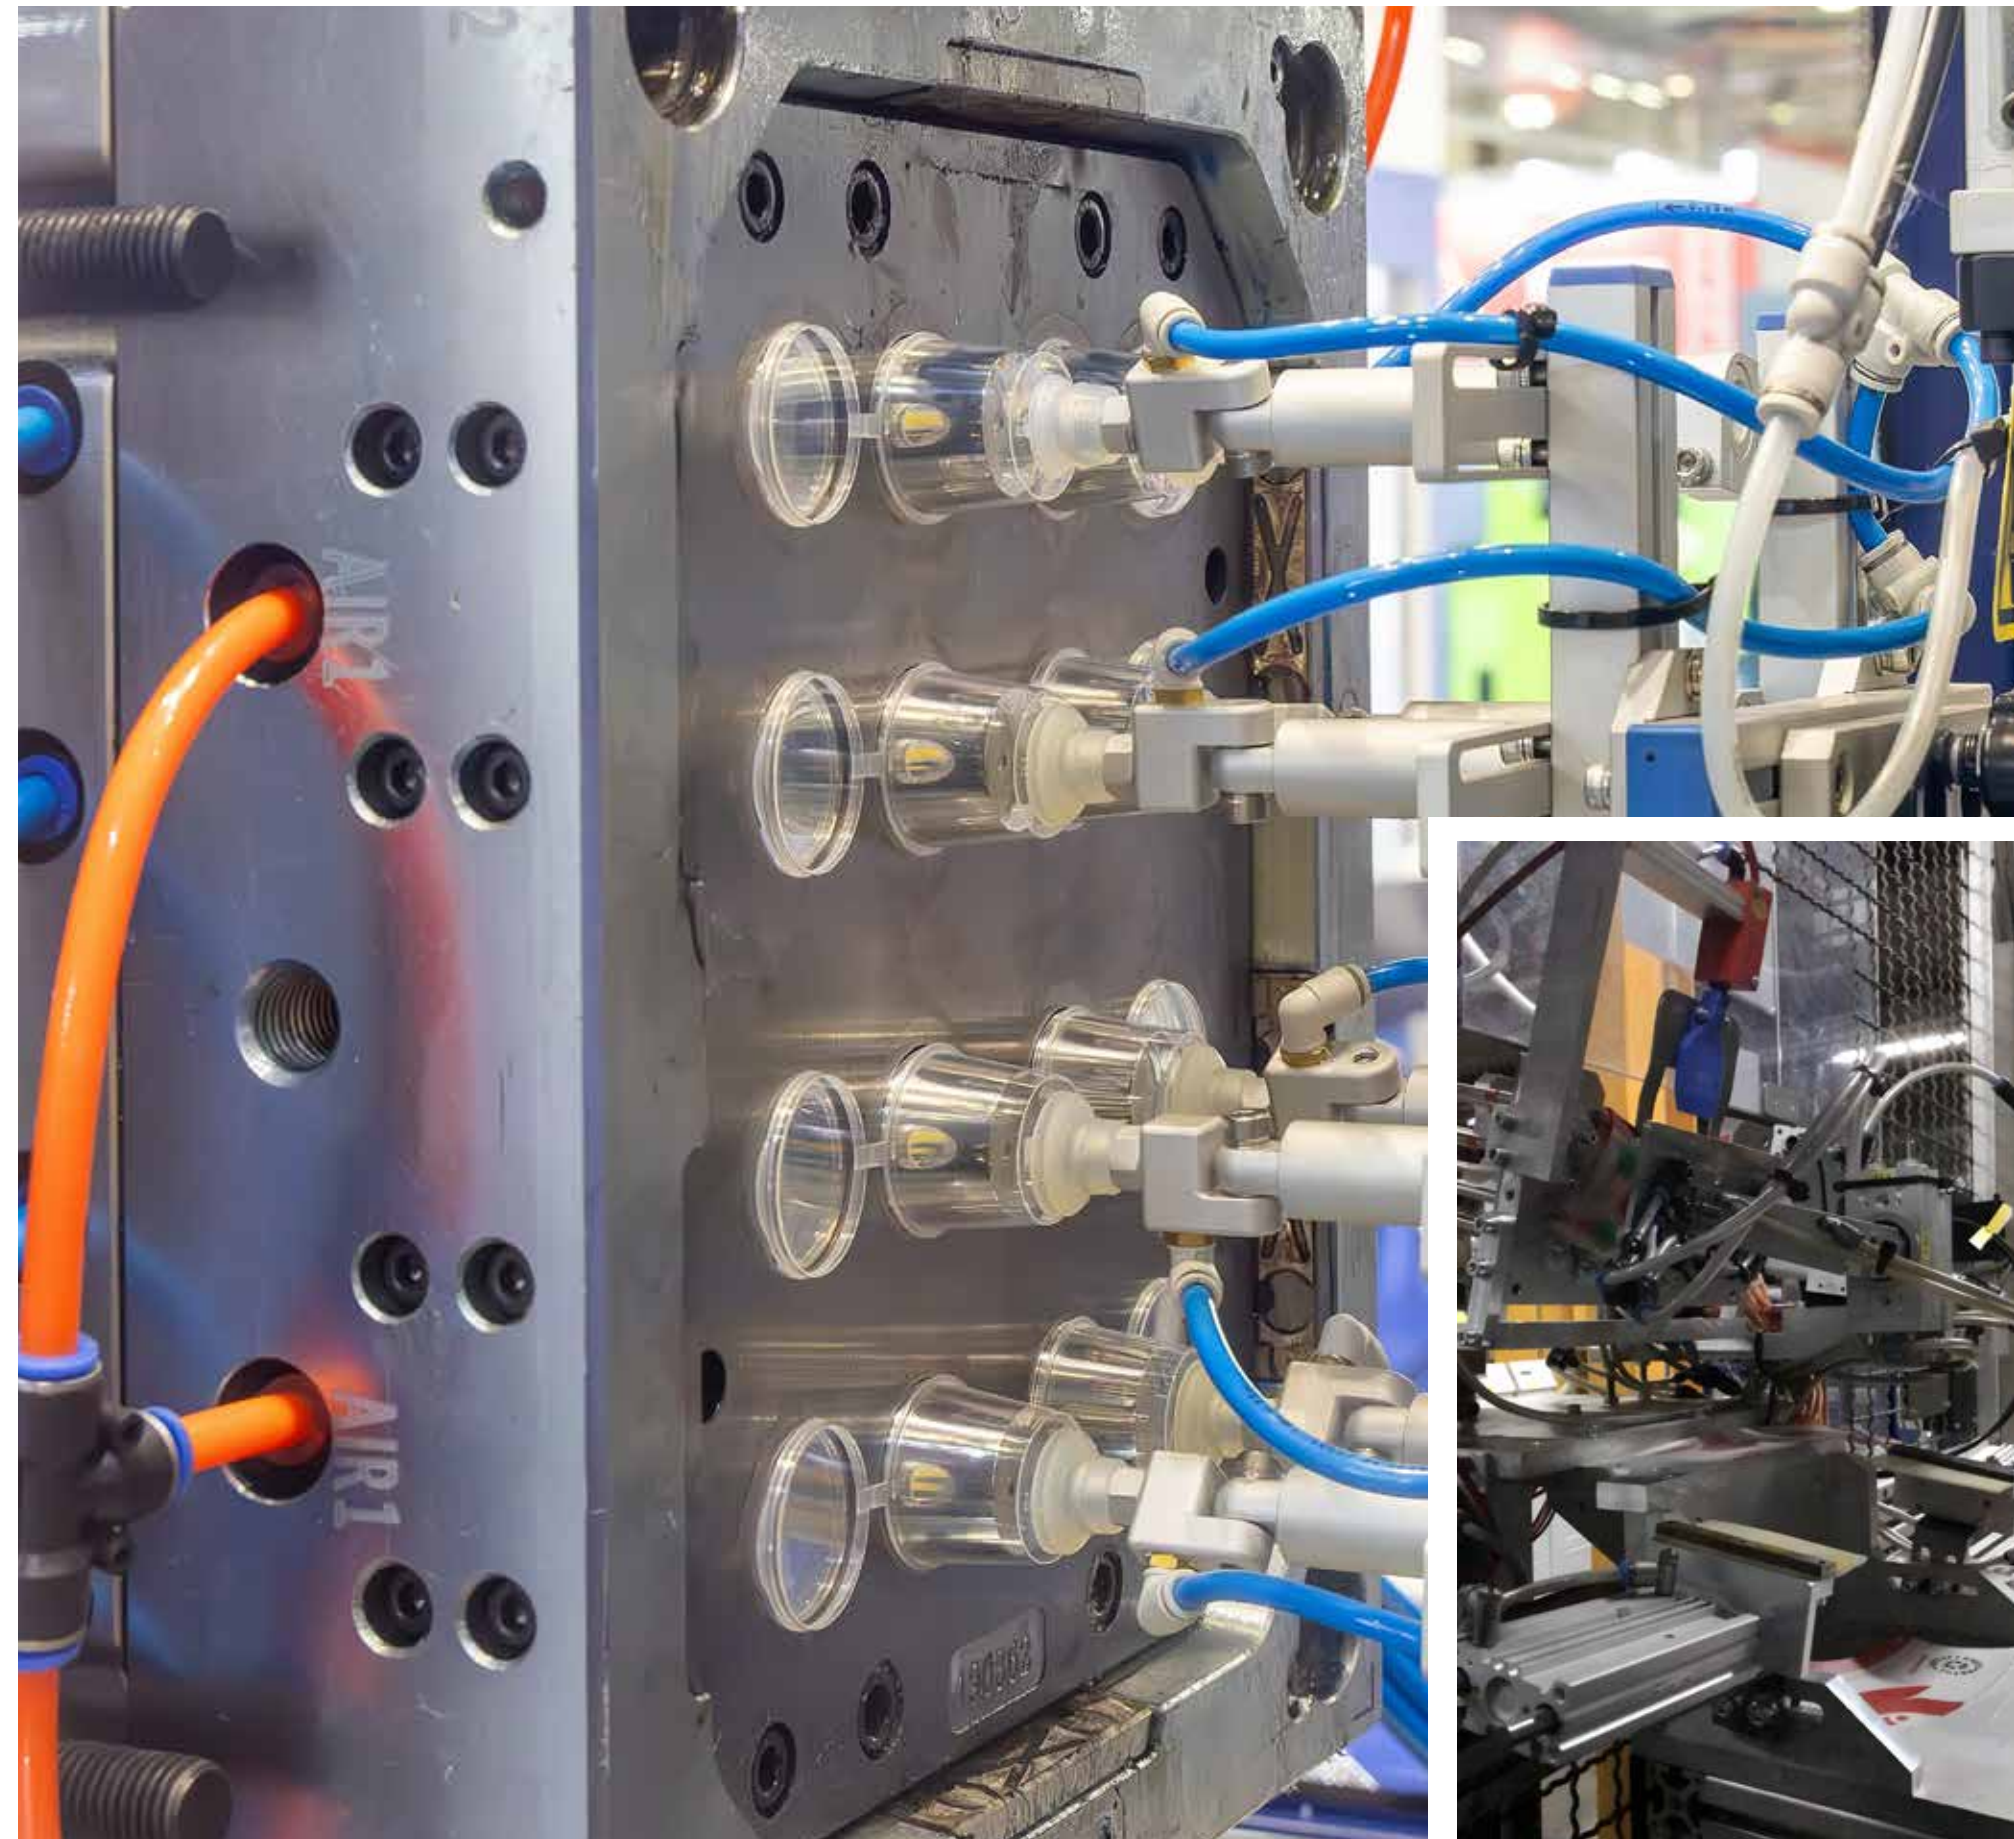

IML printing enables vibrant and detailed designs, making it ideal for premium food and beverage packaging. Additionally, it allows for 360-degree coverage of the cup's surface, maximizing branding potential. IML is favored for its efficiency in mass production, eliminating

secondary labeling processes and reducing production time.

⊗ Unlimited colors, CMYK print.

Print is done on a separate film, incorporated in the mold. Therefore, we can guarantee photographic quality and a full-surface print, to customize the entire cup from top to bottom.

TAMPON PRINT

HIGH QUALITY PRINT

Tampographic printing is a versatile technique widely used for decorating injected cups and food containers.

This indirect printing method transfers ink from an etched plate onto a soft silicone pad, which then applies the design to the plastic surface.

It is particularly effective for printing on irregular or curved surfaces, making it a preferred choice for cup or bowl branding. Tampographic printing allows for fine details and precise color application, even on small areas.

It is a cost-effective solution for medium to large production runs and supports a wide range of inks, including food-safe options. While it is not as fast as dry offset or IML printing, tampographic printing is highly adaptable,

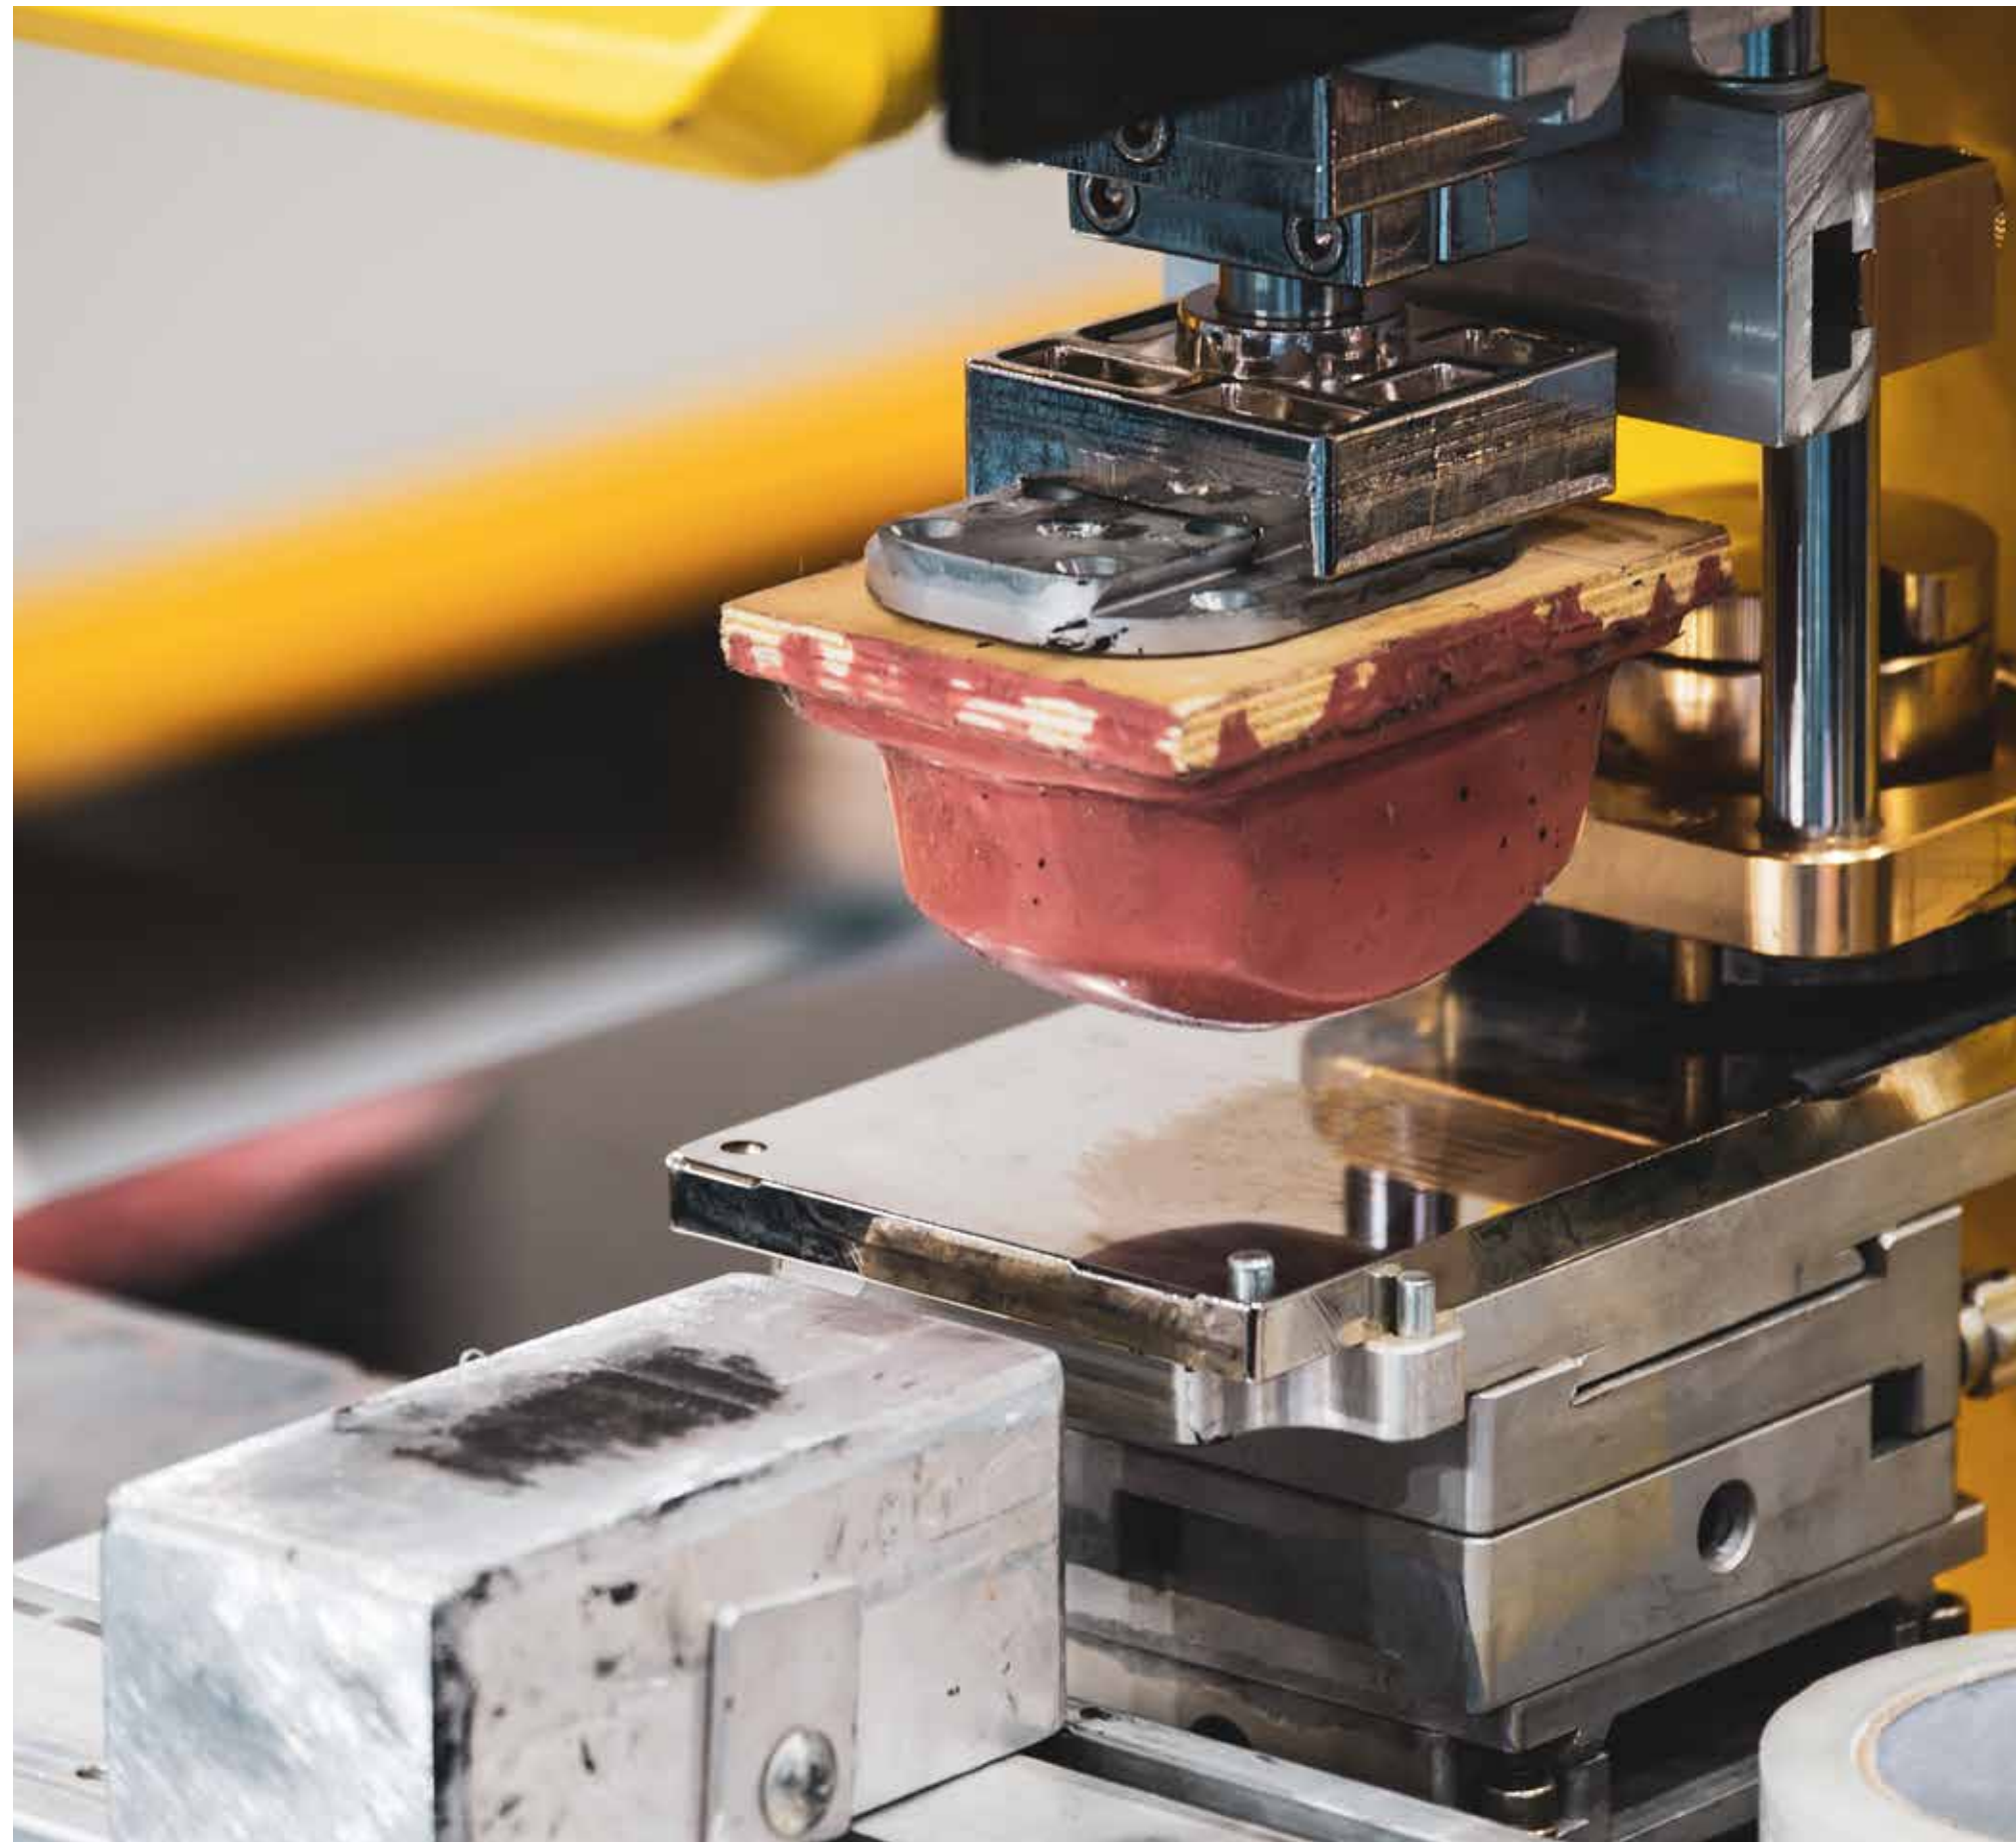

accommodating multi-color designs with excellent adhesion and durability.

It is commonly used for promotional cups, event branding, and custom packaging, providing a reliable and high-quality solution for adding logos

⊗ 2 colors max.

Tampon print can only be done on limited surfaces on each side of the product, depending on the spacing and curvature.

RETAIL SOLUTIONS

We offer a wide range of display cartons in various sizes, designed to optimize shelf space and enhance product visibility.

Our innovative packaging solutions are tailored to meet the needs of businesses seeking efficient, eco-friendly, and cost-effective options. With a focus on functionality and aesthetics, we can provide customizable designs to suit diverse retail environments.

Our expertise ensures seamless integration of packaging and display solutions, helping clients streamline operations and boost sales while meeting the demands of modern consumers.

SPECIALIST IN PACKAGING

INCREASE YOUR SALES

Effective sub-packaging and retail packaging play a crucial role in driving sales by enhancing product differentiation and consumer engagement.

Thoughtfully designed packaging not only protects products but also serves as a powerful marketing tool that influences purchasing decisions.

By incorporating eye-catching designs, clear branding, and strategic product placement, businesses can capture consumer attention and encourage impulse purchases.

Additionally, well-structured packaging creates a sense of quality and reliability, fostering brand loyalty among customers.

At deSter x nupik, we offer both pre-made packaging and tailor-made packaging solutions to meet the diverse needs of our clients.

Our pre-made packs provide a convenient, ready-to-use option for businesses looking for efficient packaging solutions, while our custom options allow for flexibility in branding, sizing, and design.

Customizable packaging enables businesses to create value packs, trial sizes, or seasonal promotions, catering to different consumer preferences and maximizing sales opportunities.

Retail packaging also provides an opportunity to communicate key product benefits, sustainability

efforts, and unique selling points directly on the package. By optimizing packaging for different retail environments, companies can improve shelf organization and streamline inventory management.

Furthermore, packaging solutions designed for convenience, such as resealable or portioned packs, enhance user experience and increase repeat purchases.

AFTERLIFE

Our food packaging is designed to be recyclable, aligning with the latest recycling guidelines. Local waste regulations should be followed for proper recycling.

Certain packaging options are compostable, meaning they can be processed alongside organic waste in composting facilities, offering an eco-friendly end-of-life solution. Composting locally ensures minimal environmental impact.

The tableware and packaging designed for reuse, it means can be washed and reused multiple times, promoting sustainability and reducing waste.

SUSTAINABILITY FROM BEGINNING TO END

IN-HOUSE DESIGN AND PRODUCT DEVELOPMENT

At deSter x nupik sustainability is at the core of our mission.

We align ourselves with the broader goals set during the Spanish Presidency of the Council of the EU, focusing on boosting Europe's reindustrialization and achieving Open Strategic Autonomy.

Our dedication to sustainability extends to the implementation of practical measures during this European presidency, with a particular emphasis on ecological initiatives, making our operations more sustainable than ever before and contributing to a greener future.

Key actions that resonate with our values include renewing our production methods, ensuring open strategic autonomy, advancing the green

transition, and promoting environmental adaptation.

Our commitment to sustainable practices not only aligns with these European priorities but also reflects our responsibility to contribute to a more environmentally conscious and resilient future.

We're convinced that it's hyper important to achieve certifications on different topics to make sure that our standards resonate with the rest of the world.

TUV INDUSTRIAL COMPOST

The products with the OK industrial compost label are guaranteed as biodegradable in a plant industrial composting, aligned with the Directive EU packaging (94/62/EEC).

SPANISH STANDARD UNE-53928 & EUROPEAN STANDARD EN 12875

specifying that thermoforming or injection plastic tableware can be used after washing in the dishwasher.

UNE-EN 13432:2001

compliant to standards for composting packaging materials, developed and approved by different agencies throughout Europe.

LIFECYCLE OF A PRODUCT

WHAT HAPPENS AFTER USE?

End - of - life management of a product matters more than ever. Since we aim to avoid waste, we offer several solutions to restore the material and energy that has been used in production. This helps relieve the stress on our environment, and reduce waste to the max.

Many paper and fiber items are (home) **compostable**.

This means that you can compost them yourself (home compostable), or that they can be composted by industrial partners to fasten the process and filter out any remaining residu.

All energy and minerals released during this process will be returned to the earth.

All (single use) plastics we use are either already recycled (R-PET) or **recyclable**.

You can dispose all items in the bin and everything will be recycled with regular waste streams, according to your local waste management.

All recovered material will be industrially cleaned and re-grinded to re-use or incinerated to use the released energy in other production processes.

Reusables work with a closed loop system. Since all items are used multiple times, collecting and washing is necessary.

Local washing facilities can help out with the logistics and return all items squaky clean.

When an item is broken or worn out, it can be recycled as well. Since the items have allways been in a closed loop in a foodsafe environment, it can be regrinded to be mixed in the material mix of the same item, making it a fully closed loop.
